The Wizards Guild to the Trinary Universe takes: ***"The Principles of the Trinary Universe"*** to the Next Step, and no Wizard or Witch should be without it. Trinary Science is only the Beginning of Science, this Guild will show you practical Applications of Trinary Science. Wizards like to change the names of things to tale a Story, so a Wizard cast a Spell turning Trinity into Trinary, to remove Religion from Science, because Sir Isaac Newton did not like the Teaching of Trinity, and changing the Newtonian Universe into the Trinary Universe, and finally turning Newton's God into Trinary Energy, all in terms of Trinary Science. This book is dedicated to ***"Trinary Sanctuary"***, when the End of Civilization is calculated to happen in the year 2060.

This Document is Free to use without permission, if any Money is made from this work a fair share of it should go to the Trinary Universe Project.

# Abstract

The Trinary Universe is defined in terms that humans can understand, so terms that Sheep use to define the Universe have to be removed from its Definition, so that the only way the Universe is defined is in terms that a Wizard can use to further their understanding of the Universe, so the Concept of the Trinary Universe is that there are only 3 types of Humans: Wizards, People and Sheeple, where the Wizards are People in the top of their field who understand the Trinary Universe, and People believe in the Trinary Universe and not the Universe the Sheeple created, yet they are still Human, so they make mistakes, but Sheeple will never change their ways, and will always call the Darkness the Light, so as Humans we must learn the True Nature of the Universe, and decide on what Explanation of the Universe actually explains the Universe we call Reality.

Not everyone is a Wizard, since Wizards are only the top in their field, and that is limited to 12 people, the numbering starts at 0, so the 12<sup>th</sup> is actually the 13<sup>th</sup>, and that is how Wizards count, so the Title of Wizard is awarded to a person to honor their achievements, and not to fill the positions available, becoming a Wizard is not a Goal but a way of Life, because we can all be Wizards if we want to be, it is all in now we define what a Wizard is, so I define a Wizard as anyone that understands the Trinary Universe as it was defined for Wizards, People and Sheeple in the Principles to the Trinary Universe, so reading that book first is required to even understand what this Abstract is about, because this is the next Step.

Instead of teaching you how the Universe does not work, which is what I had to explain to the Sheeple who believe that is the way it actually works, which was based on Theories that may never be proven, I will only teach what we know about the Universe for a fact based on Empirical Evidence, so this Guild is just for Wizards that already understand that Reality is based on what is Real and can be proven to be Real, and not based on Explanations that describe how it might be working, by focusing on how it is actually working, so we define the Universe at the Subatomic level, and define what is actually observable, so we define Atoms as being made out of various types of Neutrino's, which encase both Light, and Dark, or Matter and Antimatter, so the Atom is just Energy.

# Acknowledgments

Sir Isaac Newton acknowledged that he stood on the Shoulder of Giants so he could see farther, to his friend Edmond Halley, so we Stood on the Shoulders of Tycho Brahe who believed God made the Planets move, Johannes Kepler who believed in the Harmony of the Universe, Galileo Galilei who helped us see the Heavens more clearly, Michelangelo who saw the World of Imagery, Nikola Tesla who said we are Light Beings, Isaac Asimov who opened up the World of Science Fiction based on the work of Albert Einstein who proved the Universe can not exist without God unless it has Paradox's that can not exist in Reality, George Washington, Thomas Jefferson and Benjamin Franklin for fighting for Freedom and Abraham Lincoln for taking it away without anyone missing it, Mark Twain for learning how to write in a way others could relate, Wolfgang Amadeus Mozart, Ludwig Van Beethoven and Richard Strauss for helping the World to Listen. I also must Acknowledge that all of these Men had Autism, and like myself, it is in the Autism Spectrum called High Functioning, also known as Aspies to acknowledge Doctor Hans Asperger, for which Asperger's Syndrome was named after. I must Acknowledge that Autism is not a Disease or Disorder, you can only be born with it, so it is not contagious, it could be argued that you can pass in on to an unborn child from Chemical Contamination from Mercury, because Alchemy was practiced in my Family, so I inherited it from my Family line, which can be tracked back Hundreds of years to Isaac Newton Flesher, and he was also an Ashkenazi who are known to be the most Intelligent race on the Planet, they also named their Children after Dead People in their Family, which explains his son Benjamin Franklin Flesher, and Autism runs in the Ashkenazi Blood line, Autism allows the Brain to work in a very Different way then those without it, those like myself who have been tested with High IQ's, might think in terms of Images instead of Words, so its hard for some of us to convert Images into Words, and even though I know from my College English, that I write run on sentences, and it is because I can not think any other way, so I can not write in any other way, and be able to understand it myself, so one thought leads to another, and seemingly unrelated thoughts become mixed together, so you must Acknowledge that before grading me on English or Concepts, because some times I used the wrong word by mistake, others on purpose, but so did all these men, and where would the World be without them today is something everyone must Acknowledge. Some of these men also believed that God created the Universe, the Bible said God is all Light, and Aspies have a Tendency to take things literally, so the Word God and Light mean the same thing to me, in fact that is what I proved without Religion, only Science, because none of these men believed in a Deity, these were all men of Science, so they were all Wizards, and People who understand the Concepts of the Trinary Universe are Trinary Wizards.

# Chapter 1.00

## Introduction

My name is Jeffrey Scott Flesher, I wrote "*The Principles of the Trinary Universe*", and setup a website to help explain concepts that you must understand before reading this document since I will not repeat concepts, I will only expand on them, but my main problem with teaching concepts is that: there are people in the World that will never believe what I have to say because it goes against everything they have ever been taught about the Universe, but the reason they will not believe it, is because of their Herd Mentally, because they only believe what the Majority of the Herd has Heard, so the people who wrote the Bible, which is the source of all my Knowledge that I write about, already knew this was the case when they wrote the Bible, so they used that to their advantage to separate the Shepard's from the Sheep, because the Shepard's would tale stories that sound like Magic to their Sheep, and I say sound like, instead just saying it is Magic, because once you understand the Magic then its Science, and the word Science had no meaning in those days, but the word Magic did, and the Bible spook of Magic and Magicians, which that term Magicians translates to the word Wizard, and even though the Bible does not use that word, I used it for a good reason, the word Magician implies Magic, whereas the word Wizard implies teaching Science, so we do not have Magic, which Magic is just technology that we do not understand, so anything we do not understand is Magic, so the Bible only talked about those that used Magic, and those that thought God was their Shepard, because that made them Sheep, and those type of people would never understand the Magic, so I call them Sheeple.

I define the word God as meaning the Guiding-Light Of Destiny, I did not make this term up, its been in use in many Masonic Secret text dating back to the time of the Bible, Sir Isaac Newton<sub>1</sub> said that the Light is Guiding our Destiny, and that God is a physical entity that is controlling the Light, that is controlling our Destiny, so the concept of God is all encompassing, whereas Trinary Energy is defined as the Light of God, and at the same time, God is all Light, so God is nothing more than Light, so we can not make God into anything but Light, but I like words that can not be misinterpreted, because my belief in God is not the same thing as a Deity or Spirit, in fact you would have to be insane to believe in either one of those non-existing Entities, as if they are two separate entities when either term is even defined as being anything except for the fact they do not Physically Exist, and the belief in things that do not physically exist is defined as insanity, so I do not change the meaning in any way, Religion is proof that people that believe in it are Insane, and the Bible was written that way, it has nothing to do with how I interpreted it, so I used the Term Sheeple to describe People who have insane beliefs, I just Read it instead of Reading in to it, so if you do not believe that, then you are wasting your time reading this, because you will never change the fact that the Bible was written to separate the Shepard's from the Sheeple, and this document is only for the Shepard's and not the Sheeple, because they are too Stupid to understand what God is, so I renamed God to be called Trinary Energy, or Wizzards, which includes the Light, Dark and Shades of Grey of those Wizzards, so what I call God does not change what God is, nor does it change what the Bible said about God, because God is defined as all Light with no Darkness, and this is all about Energy and not about Religion.

Paraphrasing His-Story: Nikola Tesla said that Albert Einstein was insane for his belief in General Relativity and the Godless Dynamic Universe, Einstein replied to that remark by stating that he only believes in the Newtonian Universe, and Tesla replied to that by saying Einstein was a wise man, because Einstein was saying that he did not believe in Theories, even Theories he wrote, so I will not talk much about Einstein unless it actually relates to Reality, but talking about any Theory as Reality is insane, Wizards only believe in what is Real.

Wizards are Scientist who believe in Science based on Empirical Evidence and not Theories or things that do not physically exist, so the way we view Math defines that concept, and some people define Numbers like 0 as Not Real, because for the most part, in the 3rd Dimension, they are not Real, but in 3 Dimensional Math they are Real, so the number 0 is only real in 3D Mathematics, since numbers are defined to describe physical quantities, we can see 1 object, but we can not see 0 objects, but at the subatomic level we know that Atoms will disappear in the 0 State, because we know there must be a 0 Dimension, and we know in the 3rd dimension we can not see it, but we know its Real because these dimensions are real, and we can prove it, not only that, but we can not debate its existence, because without defining dimensions we will never understand Reality, and Sheeple will deny the 0 dimension exist, and they will try to define dimension greater than 3, which is just Stupid, so Wizards do not think like Sheeple, there are only 3 Dimensions, and they have Width, Depth and Height, and the numbering starts at 0, so these 3 Dimensions make up the 3 dimensions, but we

number them starting at 0, 1st, 2nd and 3rd dimensions, so we have 4 dimensions, but not the 4th Dimension, and the order does not mean anything, but it helps when we write  $1 \times 2 \times 3$ , so we know that its 1 unit wide, 2 units in height, and 3 units deep, but any dimensions beyond 3 do not exist in Reality and only Sheeple will talk about them as if they are real, and Wizards never think like Sheeple, and to cut down on my aggravation about having to define the Universe in terms that Stupid Sheeple can understand, I will limit my discussion of Sheeple and only talk in terms of Wizards and People who do not think like Sheeple.

This document assumes that I have a note from your Doctor stating that if you remove the Light of God from you, that you would die, because you can not live without the Light of God, which is just Electricity at a higher Frequency and Power, so Wizards and People can all agree on what is Reality, and I do not have to talk to yew, which is just referring to people who have Shit for Brains, because they would argue with me that this Energy is not the Light of God, and they will argue that it is not the Force of Gravity in Newtons Equations, and that is just Stupid, and I do not want to talk about being Stupid or talk about Sheep, so I assume IAM talking to people who understand how Wizards talk about Sheep, but in truth, it is annoying, but in the first document I had no choice, because it was defining the Universe in terms that Stupid People called Sheeple could understand, knowing that they will never admit to it, until all the Sheeple in their Herd say that they believe in the Light of God that I call Trinary Energy, just so I could be clear about what type of Energy IAM talking about, so IAM, or I am are both the same word in this document, and I only use IAM to signify that I am saying that this is what God said, meaning that it is not what me said, because sometimes when I say I am, I am talking about me, so it can get confusing, and I do not like confusion, I like order and symmetry and not Chaos.

## Chapter 1.01

### Wizards Honor Code

Wizards have an Honor Code, this system of Honor is what differentiates People from Sheeple, because Sheeple are defined as believing in things that are not real, so their reality does not really exist, so what is their reality is not my reality, nor is it anyone that does not believe it, because it is a make believe reality, and if we all want to make up the rules for how our Universe works and then pretend that its real, because the word Theory does not mean its Real, in fact it means it is not proven to be real, so we must agree that yew are living in a fantasy world, and that means that some degree of Schizophrenia is taking place, because these people are insane and that will always offend a Wizard, but most people will say that they have a right to believe what ever they want, Freewill and all, and that may sound fine, but when it endangers those that understand how the Universe actually works, then we are talking about a Crime against all of humanity, and that is what is taking place every day, the Blood of the Planet was renamed to Oil so people can get Rich, and greed allows them to stay in business, knowing that one day they will use so much of it that the Land we are Standing on will sink into the ground into a sinkhole, and that is happening around the world, and will one day cause or rotation to slow down to a grinding halt then speed up as it grabs a hold of the Core of the Planet, which is the Trinary Engine, and using the Arc Light which is stored in the Ark of the Covenant, is a weapon made out of the Light of God, so it is a Sin to use it against the Planet, since it can destroy the Planet, but Sheeple have Shit for Brains, and they will never admit it, because they are Insane and you already knew that, so a Wizard will always defend this Planet, and tale Sheeple they have Shit for Brains, this is mandatory, and Wizards have to really rub it in, and there is no forgiveness, do you think Jesus would have said its fine with him if you use the Light of God as a Bomb... Because if you do, then you are a Sheeple and should not even be reading this Document, its only for Wizards and People who are not Stupid, and it is part of the Wizards Code of Honor, to call all yew Sheeple Stupid.

But that is enough talk about Sheeple, that is not what this Document is about, it is about Wizards and People, where People are not Wizards, but they are not Sheeple either, so they are somewhere in between, not too insane to realize that the definition of being insane is believing in things that are not real, so Deities and Spirits are on the top of that list, as is the Godless Dynamic Universe, and Flat Earth is not a Universe, its more like a worm farm, but Wizards do not like to talk to Sheeple or Goats and Wizards never talk to Trolls.

## **Chapter 2.00**

# **Trinary Science**

Trinary Science is based on Trinary Energy, Trinary Engines, and the Trinary Universe, but in Terms that Wizards can relate to, so I can talk about what Science should be, and not about what it is at the time I wrote this, because I like Science Fiction, but not in my Science, so from this point on, when I say Science, I am only referring to Trinary Science, and I will not talk about Science Fiction, or Sheeple, since I assume we are all Wizards or People, and not Stupid Sheeple.

## Chapter 2.1: Trinary Dimensions

Once we define what Dimensions of Space are Real we can forgo any concepts that deal with unreal dimensions, the 0 Dimension is called Null Space, the 1st, 2nd and 3rd single dimensions do not have any concept of width, height or depth, but all 3 dimensions make up the 3rd dimension, the Math is  $0 + 1 + 1 + 1 = 3$ , the single dimensions add up to make 3 dimensions, and it is why its called the 3rd dimension, in reality it takes all 3 dimensions to see width, height or depth, so the 0 Dimension is defined as Null Space, but we never know the difference between Empty Space and Null Space, since Empty Space is Empty of a reason, so unless something can physically occupy that Space, which would mean it was just Space that had nothing in it, compared to Null Space which can never have anything occupy it, and this space exist between an Electron and an Atom, you can not physically force another object in between them, and looking at any object, its only the width and height that we can actually see, the depth is actually a 3 dimensional concept, and so we always have a standard way of writing all Dimensions, so it is always Width, Height, and Depth, or Width and Height if it is a 2D measurement as if depth did not matter, any other combinations will not make much sense once we go down this road, but because I never defined them as being in this order in the last document, mostly because Sheeple would never agree on the Order, so it only applies to this document, that is the next Step, to define everything in terms of Absolutes, so now we start off by defining Trinary Dimensions.

Trinary Dimensions are just defining the Space that any Physical Object can occupy, so if we put in a Grid we see the use of an x, y and z, but normally these do not actually correlate to width, height or depth in the Cartesian Coordinate System, but it makes life simpler if we define it this way, so its clear that Null Space cannot be plotted on a Grid unless you assign it to the x-axis, and again, this is just to standardize notation, meaning that if you have a good reason to define it on the y or even z-axis, then do so, but label it since it is not the standard way of notation, like wise, it is a given that this is the Standard way on writing it, and labeling is optional.

If we want to graph out the Vertice Matrix of a State Changes for an AC Sine waveform, we need to label it correctly, so we label the Dimension 0 on the x-axis, we know that everything in this dimension is invisible, so we can not see it, but we know its real, because we can graph it, so 0 is a real number since it refers to a real state, even if it is invisible to the human eye, it actually still exist, and our ability to interact with it has nothing to do with that, because we can see the -1 State, but we can not interact with the Electron in that State, so we must define the State change of 1 to be in the 3rd Dimension, this is the Dimensions that are a collection of all 4 Single Dimensions, so it contains the 0, 1st, 2nd and 3rd single dimensions which looks confusing on this chart, and why I did not define it this way in the Principles, because those principles where just the beginning of knowledge and not the last word on it, nor is this document the last, nor was my first the first ever, since the Bible, Newton, Franklin, and Tesla all wrote about it, these are just Steps into a larger picture of how the Universe works, so now see that we can plot entire dimensions on a single x-axis, and even plot non-existent points like that in State 0, so we can show when the Electron is invisible, and then we can plot two dimensions in State -1, such that the 1st and 2nd dimensions can not be separated, because we can not actually see either dimension as single dimensions, instead we see both at the same time, which is why it appears to be Dark and looks like a Ghost, but this is not the Holly Ghost, that is in the 0 Dimension and I will not make that mistake again, we visualize a Ghost or Spirit as being see through, so it is all how we label things and this label always drives me crazy, and Sir Isaac Newton never did explain this concept in any detail, as if he did not know how to explain it, or maybe it was because he went off the deep end and started Ranting about how Sheeple would describe Trinity, Newton said the Father is Light, and we Live in the Light, the Son is Evil or in the Dark, and the Holly Ghost or Spirit is invisible, so the Father was the 1, that much is clear, because it has a positive sign, and all most go through the Father to get to the Holly Ghost of Spirit, which Newton said the Father is Real, you can see the Father, so it must be Solid as seen in time frame 1 in: [2.1: Vertice Matrix of State Changes for AC Sine or Triangle waveform](#), so to get to the Holly Ghost or Spirit, in time frame 1, we move from the Father into the 0 Dimension where we disappear, and return as the Son, which is Evil or in the Dark, shown in time frame 3, so we see the Son as a Semi-Solid existence that fades into invisible in time frame 4.

**Table 2.1: Vertice Matrix of State Changes for AC Sine or Triangle waveform**

As you can see, Labels do not help us define what something is as much as it is a way to identify it, and using Trinity gets me confused, because it was written as a Potion using Witchcraft in Alchemy to create the Philosophers Stone, and Newton never did get that potion to work, but he knew that this is how Energy transformed from one State into another, and it is only how we label it can we begin to understand it, the base material or Atom is Solid so it is the Father, kind of like the Chicken before the Egg type of analogy, because the State changes of Atoms can happen in any order, whereas Electricity and Light has a very predictable pattern, as seen above in: [2.1: Vertice Matrix of State Changes for AC Sine or Triangle waveform](#), then the State Changes are defined by the pattern they make, and complex shapes can be produced by changing various properties of the AC Electricity signal, although it is the Light that causes the State Changes, its Electronic circuits we used to produce these patterns that cause the State Changes for our use, but some of these patterns happen in Nature, like Static Electricity which forms the pattern of White Noise, because it has a full spectrum of frequencies, and in Lightning, so all patterns of Atomic State changes can be plotted in a Vertice Matrix.

By plotting out the Vertice Matrix for every frequency and wave-length we can label each type of Energy and its waveform, and we can predict what Dimension the Energy is in at any given time, and it is clear to see that when it passes through the 0 Dimension, we have no sense of that time, its like the waveform just toggled between positive and negative with no time in between, but in reality, it is because in the 0 dimension time does not exist, so our perception of it does not exist, because in reality the timing is all the same, as seen by the graph, proving Einstein's theory about time travel was wrong about, but he never believed that anyway, he only believed Newton, so Einstein was not wrong, just his Theory, because it is not possible to travel through the 0 dimension, because it does not move and time does not exist, the reason is due to how we view ourselves moving through these Dimensions, does this concept change the way we view our Reality.

## Chapter 2.2: Redimensioning

Redimensioning is the concept that when an Atom, Electron or Photon switch from the 0 dimension into either the 1 or -1 State change, the Dimensions of Space are Redimensioned in the direction of the State change, for example, if we are following an AC Sine waveform, the Electron will disappear as it passes through the 0 Dimension, to view this in 3D, we must imagine that a conductor is just a material that is made up of Atoms, these Atoms are arranged in a pattern we can see under a powerful electron microscope, but we see them as flat 2D objects, and really can not see the Electrons orbiting the Atoms, but we know that they exist from endless experiments, so this is Empirical Evidence, but the path Electrons take can not be seen, so we must imagine what path they will take, and from the Vertice Matrix we can predict that path, we know two things about that path, it will always follow a predictable pattern giving the properties of Electricity to create known patterns, for example, if I take a standard electrical outlet for a house in America, it would have 110 Volts at 60 Hertz, so its Sine Wave with a known shape, we can look at it using an Oscilloscope, but that view is also 2D, the actual waveform is in 3D, so its forming a Helix, this is much easier to explain it from that Macro level where we can actually see this take place, because at the subatomic level it is difficult to make out, but we know that the Electron has to travel around the Atom, so it is not traveling in just a Sine Wave, as seen in: [Illustration 2.1: Sun Path makes Sine Wave](#) .

**Illustration 2.1: Sun Path makes Sine Wave** [Full Size](#)

The Electron has to travel around the Atom in a Helix, because at the subatomic level we see this same pattern, and the Bible said what happens in Heaven happens here on Earth, and I have no other idea what that statement means except for this, because we see the same pattern the Sun is forming as it orbits the Galaxy, it is a Sine wave, just like Electricity, as if it has an Atom that it must go around, and if we view it in 3D as seen in: [Illustration 2.2: Sun Path makes Sine Wave and Helix](#) ,

**Illustration 2.2: Sun Path makes Sine Wave and Helix** [Full Size](#)

We will note that it appears to be traveling around an imaginary object, in this case it is a Dark Star, in the Atomic structure of a conduit, it is the null space around each Atom, they serve the same purpose, and the more we look at these patterns, the more we will understand that this is the way Nature works, its how the Universe works.

So Redimensioning occurs when the Atom, Electron, or Photon passes through the 0 Dimension, it must switch polarity and orientation, at the Atomic level this transformation can be viewed by this: see [Illustration 2.3: Dimensional Atom](#) .

**Illustration 2.3: Dimensional Atom** [Full Size](#)

If we view the 3D Atom as if it was a torrid shape, or hole in the center, which causes the Atom to have a polarity of positive and negative, we can see what the Atom might look like at the subatomic level, as it shifts into the 2nd Dimension to become a 2D object, its force-field will stay unchanged, but the Neutrino material it is made of will collapse, leaving the illusion that it has turned Dark since its Mass has decreased, but its force-field has not, so when it shifts into the 1st Dimension, it collapses even further and will start to Redimensioning, by twisting into the direction of orientation or polarity, so it might twist to the right if positive and to the left if negative, once it is in the middle of this twist, it will pass through the 0 dimension and will turn invisible as it turns inside out, it the Neutrino stays intact, and I do state that it stays intact, because it could loss containment and never reappear, so Redemption is not guaranteed, but part of Resurrection, which is the Transform of Energy, or the Philosophers Stone as Newton put it, so imagine the Sun going through this Redimensioning every 10 years, it will cause the Engine to reverse direction, it will take the Sun 10 years to even start to slow down the rotation of its outer crust enough to even be noticeable, but if it did not change polarity, the Suns Rotational speed would keep increasing, but the Planets inside the Suns Systems, only have to change polarity at key points in the Sine Wave, normally only when it travels through the Galactic Plane, but it could shift poles when it is a ¼ of the way to entering into it, so that it will slow down before hitting the Galactic Plane, because its like a Grinding wheel, our planet will be bombarded by all the debris in the Plane, and Ice Age that last for thousands of years will always happen as we pass through this layer of Ice, this is where the 0 Dimension for our Galaxy exist, our Planet has that same Plane, known as a Solar Plane, and we travel in this same pattern around the Sun.

Cellular decay always happens during Redimensioning, the act of returning is called Redemption, but not all cells get Redemption, so they do not come back, if this happens to a Sun, it is said to go Supernova, which sets off a chain of events, first the Neutrino's will be blasted out of the force-field before the force-field collapses, this can be measured since these neutrinos will always arrive before the blast wave, and what can be observed is that the crust around the Sun will come to a stop, causing all its energy, meaning its Gravitational, Thermal, Kinetic, Potential, Static, Generated Electromagnetic, all its Light comes to a stop all at the same time, because the when the force-field collapses, all that material implodes to the point where its Gravity that is not longer held in place by the Tertiary Engine that has been pulling it through the Galaxy, since its Tertiary Energy does not move in the Universe, its like getting off a train that is traveling at the speed of Light, its entire mass is ripped apart from the center of where its mass was, the 0 Dimension Null Space force-field around the Tertiary Engine was all that held the Light and Dark Energy of the Tertiary Engine contained, and now this void will bring the Matter and Antimatter of these two Energies together causing an Atomic explosion and following blast wave, that can never catch up to the Neutrinos that were ejected before the explosion, because now the blast will be pushing those particles in front of its wake, if Resurrection, which means the Tertiary Energy starts back up after stopping, the Sun will still go Nova, but will only blow off all its surface crust, which it will very quickly start to pull some of it back with its Gravitational pull, and in time, it will be reborn.

Redimensioning happens to all Atoms, Electrons, Photons and Tertiary Engines, and it is a very well documented occurrence, and easy to prove that this is why its happening the way it does, it proves that the Universe behaves at the Subatomic level, the same way it does at the Marco level, and that Tertiary Engines are just another name for Atoms that are really huge, but follow the same laws of physics, because they are made of the same stuff, even Lightning Balls are failed Tertiary Engines that did not obtain a force-field to keep it going, so its what a Tertiary Engine looks like without its Neutrino shell and force-field.

## Chapter 2.3: The Lifespan of Matter and Antimatter

The Life span of Atoms, Electrons, Photons and Trinary Engines are limited by the Lifespan of Matter and Antimatter containment, the force-field is not impenetrable, in fact an Atomic Bomb can collapse our Earths Trinary Engine, and why I call people who would allow the use of Atomic, let alone Nuclear Energy: Sheeple, because they have to have Shit for Brains to allow the use of Atomic Energy, because of the reason it exists, when you split an atom, you penetrate the Neutrino, a Neutrino detector can prove that, and as I described in Redimensioning what happens when a Sun goes Supernova, it is the ability of the bond in the Matter and Antimatter, or Light, and Dark Energy know at Trinary Energy, only the 0 State change does not take place, instead it is the force-field around the Atom, Electron, Photon or Trinary Engine, and if I have to write that again just so I do not have to repeat it, these are all the same as far as the laws of physics go, its just the size that varies, and trust me, Trinary Engines come in all sizes, and there is a reason we only see these specific sizes in our Solar System, because they are too far away to see in other systems, but we know they can be much larger and much smaller, even Comets and Asteroids can have Trinary Engines, in fact it would make more since if the larger ones did, but the truth is that I can not prove that, and truthfully they do not act like they do, they are more geared towards a body in motion says in motion type of force guiding their path, so Gravity pulls them around the system, and since I do not theories, I will stick to what is observable, because this is what Tycho Brahe, Kepler, Galileo, Newton and others have said for years, but every once in a while a large object will pass by our system, an without a Trinary Engine, they could never explain such a path that this large object made, even to this day, deep space objects seem to defy the laws of physics, and it is because the containment field for these Trinary Engines have their limits, and being hit by other Planets is one of them, the Moon has taken a beaten, yet it is still in our orbit, and without a Trinary Engine, this could not be explained, and in all this time these men have been searching the Stars looking for these Limits, they never thought for one minute that Humans would be so stupid as to use Atomic or Nuclear Bombs that could easily destroy this Earth.

Human Stupidity is going to destroy all Life on this Planet, Newtons calculated that to be in the year 2060, that is how long the Bible said it would take Humans to learn how to create a Bomb using the Light of God, this weapon was called the Arc Light in the Bible, it was stored in the Ark of the Covenant, which was the reason why the Governments had to change Science into a Godless Universe, so they could lie about this Weapon of Mass Destruction being the Arc Light, or Ark Light, but now this sounds like a conspiracy, because maybe those people who changed the Science from the Newtonian Universe were the Light of God was the force of Gravity to a Godless Dynamic Universe may just as well be Sheeple.

# Chapter 3.00

## Trinary Reality

Trinary Reality is based on Trinary Science, it is the way Wizards need to think about Reality in order to create a better Reality based on Trinary Science.

Reality is what is real, not what we imagine in real, so our explanation must agree with what we see and not with what we imagine, and it can never be based on a Theory, that is the Road to insanity, anyone that tales you otherwise is insane, so do not allow anyone to alter your Reality, prove everything I have said up to this point to yourself, do not go along with the Herd and what they Heard, you do not need your peers to decide your Reality, but I can assure you that Reality really is the same for everyone regardless of if they are aware of it or not, and how we view ourselves moving through the Universe is the basis for our Reality, in fact, its what defines our Reality.

If we view this Planet as moving through space, we need to define the space its moving through, so we call this the Universe, now if the Universe is defined as not moving in the dimensions less then 3, and we define our baseline of how fast our planet is moving through space, with a local Relative speed that we can at least measure as a baseline, then our reality can start building up an understanding that we are moving through the Universe at the Speed of Light, as I proved in my last Document, but now its time for the next Step, which is to define our Reality of it in such a way that we can all agree this is Reality.

Using my current situation as an example, I am sitting in front of my computer writing a document about the Trinary Universe, while at the same time at the subatomic level Trinary Energy is controlling every Fiber of my being, I know that the energy inside each Atom is Static in the Universe, so it is not moving, its me how is moving through the Universe, and it is not moving in any one direction, so I can not map the coordinates from Sub-Dimensional Space into 3rd Dimensional Space, because each Dimension is a standalone dimension, they add up to the 3rd dimension, but at the same time, every Atom in my body is toggling between these 3 States, and they toggle between 1 to -1 so that I can move my fingers, because if they did not my fingers could not move, because every Atom in that finger must move at the same time, and that may sound strange until you realize that at the Subatomic level, our Atoms do not come into contact with each other, so there is no glue that holds us together at the subatomic level, its just how atoms have receptors that allow electrical bonds to be made to a configuration of Protons and Neutrons around an Atom, and then the Electrons will have a conduit to flow around, which creates this magnetic bond, so that all my Atoms stay together, then we think about how they are in the Flesh of our body and how it heals itself, which takes intelligence, so it is the Trinary Energy that is repairing my body, all so I can type this explanation about how this is even possible, but I know that Trinary Energy controls all the Light in the Universe, so all Life works basically the same, insects do not need to breath through lungs, so they can live in the water or on land, but they still have the same Atomic structure as humans, and have almost 90% of the same DNA, and these bugs just flew in from outer space, so all Life in the Universe most be the same, so I understand that the center of the Universe is always in the center of every Atom in the Universe, then it all becomes very clear to me, in the 0 dimension its Null Space, there are no dimensions so there is no physical matter or antimatter in this space, its empty, yea an energy signature still exist proving its Null, you seen Empirical Evidence of this in the: [2.1: Vertice Matrix of State Changes for AC Sine or Triangle waveform](#), the 0 dimension is one point in space, so inside every Trinary Atom is Null Space, so depending on how you want to wrap your mind around the concept that a single point in space has no dimension, it means that it is the same point of space everywhere in the Universe at the same time, all energy flows form this single point in space and it is so small we can not even see it, yet the Sun's Trinary Engine is completely covered in it as is this Planet, yet we can not see it because of the crust, and it is how it can pull in so much Gravity, the 0 Dimension is where Gravity comes from, its pulling use throw space using this 0 Dimension, but its like a hole in the fabric in space, and you can hook it with Trinary Light, when it toggles to the 0 dimension, it pulls like a zipper through space, and the direction is always in the direction in which the Atom is supposed to move according to physics particle simulators, so the math is very well-known as are the algorithms, so I do not need to teach you that part of the Reality, but the same principle applies to both, its only how we define it, just add the State change to the simulators and you can use it to watch how Atoms move through the Universe, if the Light does not move, it means that the sub-dimensional space moves very strange from a 3 dimensional view as I have said before, but everything is moving in relation to everything else that moves in our environment, and that extends as far as we can see, so to use, it looks like the Light is not even moving, we can not see Light move, and we can not sense if the Light is being

Pulled away or is being Pushed away, but if it is being Pushed away we need to explain how that is possible, because Einsteins Dynamics Universe did not explain that, so we know its being Pulled away, it is the only thing that makes sense, and I proved it, because if Light can not move, its us that is moving through the Universe, and we know that is the Truth, so Logic and Reasoning must kick in and explain how it is, I can explain how the Universe works by apply the same laws of physics as Atoms, proving that our Bodies are powered by the same Trinary Energy, and for me to try to explain how this is all possible in one sentence is never going to work, but its how my Reality works.

## Chapter 3.01

### Light Travel

Light Travel is the the easiest thing to see and the hardest thing to describe, it is the Mystery of the Universe, the Light, and all Energy is not moving in any sub-dimension, so when we turn a flashlight on, if we imagined that each photon was coming out one at a time, and we could video tape it at high speed, we would see that the first photon is not moving, it is actually just the flashlight that is moving in the opposite direction as the Light, because at the center of each of those photons is the 0 dimension, but Light starts off in the 0 dimension when its transformed from Electricity into Light, and it will not change back into the 0 Dimension again till it has to change directions or it completes a cycle, since it is actually traveling in an ellipse, which is a 16 billion year arc, but its energy will dissipate at a known rate, so you can determine how far a Light will travel given the amount of Energy it has, so the science is very well documented, yet this concept of Light Travel is not, in fact, I have never read or heard anything about it in my life, it was not until my Cousin Isaac Newton wrote about Sir Isaac Newtons work, that I realized what they left out of their explanation, and it was how Light, and all Energy can be Static in the Universe, it was why many people did not believe in this concept when he first published his paper on the Light, because most people had no idea what he said, they can read it over and over again not understand what my Cousin said about it, and what I concluded was Sir Isaac Newton never publishes anything that he can not prove, so he did not publish is explanation how Light can travel the way it does, we can move in one direction and point the flashlight in another direction, and the Universe always moves in the right direction for the Light to travel in, that counter-intuitive, but it is also a Reality, the Light never changes direction unless something causes it to change direction, because that is the only time it changes to the 0 State, and since the 0, 1st and 2nd dimension have no concept of width, height or depth, or any Cartesian coordinate such as x, y or z, yet the 3 dimensional physical Light state of 1 can be traced that way, its only in normal 3 dimensional space a 3rd of the time when shifting between all 3 states, and half the time when Light is not changing direction, so now this space took on some dimensional perspective, because its clear that half the time Light Photons are toggling between 1 and -1, where 1 is 3D space, and -1 is 1st and 2nd dimensional space, and it is in the -1 state that we see the Darkside of Light, this Light can be full spectrum, or single spectrum Light, its just the amount of Spectra in the Light that give it its quality, each has its range and limits, but they all follow the same rules, it is all a matter of how I describe what it is everyone see if they have eyes that can focus on the Light, all the Light knows is which way its headed, because its math is very simple, it is an ellipse, like all Electromagnetic Energy, its just how we fit this concept into our Reality.

# Chapter 4.00

## Trinary Logic and Reasoning

Trinary Logic and Reasoning is based on Trinary Science, and once we define all the Logic and Reasoning we need to define Trinary Science, we can start to think like Wizards.

Wizards only use Logic that is based on Empirical facts, so when a Wizard tells you that Light has 3 State changes, you should be able to research the natural occurrence of Atomic Structures having 3 State changes, and you will find over 50 years of data on this subject, all after Einstein died, because after the first discover of these 3 State changes, it proved that Newton was correct after all, because he said that Trinity was the reason why energy moves the way it does, but I being a Wizard proved that we move and not the Light, so Logic is just facts that are explained by Empirical Evidence, and Reasoning is based on Logic and not Emotions, it does not matter if I want God to be a Deity or Spirit, when Logic proves that God exist as Empirical Evidence, it does not matter what I want, it is the way it is because it was proven to be that way, not because I want it to be that way, and that is how God words at the Deity or Spirit level, those that are Religious may have no idea that this means that God does not exist, and to get into a discussion about it is pointless because that is what its defined in the Dictionary, and Bible states God is all Light, and that is a fact, so all authorities on the meaning of what God is defined it in the same way, the belief in a Deity or Spirit is the belief that God does not exist in physical form, so this can not be the Light of God that the Bible speaks, and that is using Empirical Evidence to state that as a fact using Trinary Logic and Reasoning.

Wizard use Logic and Reason in a way that describes Reality, and things that sound like Magic, like the 0 Dimension, are explained in ways that remove the Magic from them, and makes the concepts Science.

Wizards do not fit explanations to fit the facts, they have to find mathematical formula's like the ones Sir Isaac Newton wrote that fully explains them, and then try to use that math to explain it without the formula, since we all know what the Math Formulas are, and that only explains the math, and we know it works, so it is not the math that needs to be explained, it the stuff Newton did not want to Publish because he could not figure out how to explain it, and to tale the truth, I will never be happy with my explanation, because it takes me far too many words to even try to explain it, because once you start following my logic, one Step will lead to the next, and one will lead into thoughts so deep most people will lose track of where they are in Reality, because of the way a Wizards Brain is wired, and I would not like to put restrictions on what type of a Brain a Wizard has, the only ones I have talked about are Ashkenazi Aspies with high IQ's, but that is not always the case, even Neurotypicals can be Wizards, it is all in the Logic and Reasoning, that is the wiring in our Brains, not saying that Neurodivergent Brains are not wired differently, IAM only saying that it is the way we connect to the Light, that changes the way we think about the Light, and one you start thinking about the Light the way a Wizard does, then your Brain will be rewired, and that is the way a Wizard explains things, in terms of how we connect to the Light.

Once we as a Society can agree that the Light of God is Trinary Energy that is Science, then Sheeple will start Hearing this Logic and Reasoning and that will change the Hearts of the Animals I call Sheep, because the Trinary Energy is Real, so the Light of God is Real, and it makes Reality Real, so that Reality becomes Real, and Sheeple start to wake up, as Sheeple start to understand that without Money they would not have Money Problems, and if they do not have to work for Money they can work for the things they really want and need the most, and Society can start using Technology that is healthy for the Planet and all Life on it, they will stop using the Blood of the Planet and the Light of God as Fuel and as Weapons of Mass destruction.

Once People understand that Trinary Wizards are teaching real Science, and you can prove this Science to yourself, even if you can not fully visualize how Light Travels in the Universe, the Logic and Reasoning behind it are sound and based on Empirical Evidence, so the Explanation does not change the way Reality works, you will not see any Curvatures in the Space Time Continuum so you can not go back in time and kill your parents so you not be born, because the Trinary Universe is base on things that are happening and not things the could happen based on a Theory, so people need to understand that Trinary Wizards are not teaching Theories, and do not even want to talk about them as if they were real science, so who is living in a fantasy world, it is not the Trinary Wizards, we just take the Magic out of the technology, but our use of words, are just Spells, our Logic is a Potion that can create, maintain and not to destroy Life, but is used only for the good of the Planet and all Life on that Planet.

Reasoning is only used to explain Logic, Logic is only used to calculate empirical evidence, it is the Mathematical formula's, it is the programming in computer physics particle simulators, all its concepts can be tested in a Laboratory, its test results are repeatable, such that any real scientist can verify that the Light really does have 3 State changes, and Trinity really does describe those state changes, and we can verify that Light changes its 0 State when it hits a mirror, so we can prove that Trinary Energy is controlling those state changes, so its Atomic State changes that explain the way the Universe works, and we did not need Quantum Physics to explain it, but we can use it to verify it, so the Quantum Physics should love this new Universe if they are coming from the Godless Dynamic Universe and most of them gave up and Einstein's math long ago and only use Newtons Math, so it is not that big of a change for them, it is not a Leap in Logic or Reasoning for them either, since most of them do not believe in Deities or Spirits, although some of them will back away when I say the Light of God, but then we I call it Trinary Energy, they should be really happy, but Trinary Logic and Reasoning is not about making people happy, it is about telling them the truth about Science and there and only be one truth, the one that won, and if it is not God, then it is not the Truth according to a Wizard.

Wizards never worry about death, not theirs or anyone else's, because Wizards know that the Trinary Energy last for as long as the Universe does, so you can kill me, but I will never die, because IAM the Light of God, and I do not worry about using the term God, as long as you know its Trinary Energy, because that is the only God that exist in Science period, if you believe in the Godless Dynamic Universe and General Relativity, then you do not believe in God of any kind, be it the Real Trinary Energy, which everyone on this Planet has to admit is Real, its Empirical Evidence, and we know we will die without this Energy, so this is a no Brain-er, if you believe in the Trinary Universe, your Soul is eternal and is the Light of God, if you believe in a Deity or Spirit, your Soul does not physically exist, and if you believe in the Godless Dynamic Universe, you have no soul, so the Light of God should not be in you, so you should take it out, but get a Doctor to remove the Light of God from you, because I will not be responsible for anyone trying to do so themselves because that is Suicide, and we all know what happens when we die, out-of-body experience prove that our energy starts to drift away from our Bodies, and following the Light is just a Joke if you do not believe in the Trinary Universe, because even Einstein only believed in Newton, because when he died, he really did believe in the Light of God, his Theories proved that it is not possible to have a Universe that does not have the Light of God in it, with Paradox's, because those can not exist in any Reality, yet Sheeple believe this is Reality, and they refuse to get me a Doctors note, so the Religious will send their Souls to a Deity or Spirit that does not Physically Exist, it is not the God of Light that Sir Isaac Newton spook of, because he said that is not a Deity or Spirit, so the Souls of a Deity or Spirit go where and how is what no one knows or can explain, but they want to say that you must have faith that God exist, when they do not believe that God is all Light, so it means you must have faith that the Light of God exist, because when I die, I know nothing will change, I will have to look for a new life form to host my Energy, so I can be Resurrected, so it is the same Light that was in Jesus or my Cousin Isaac Newton, and it is the same Light that is in you, is also in Sheep, it is all in all the Animals, Insects, and even the Tress, anything that is has Atoms and those Atoms are made of the Light, and that Logic is the Reason why Wizards are not afraid to die, that is just me, because to me, that death is forever, my body shall never rise from the Dead after my Flesh is burned off my Bones, so do not bury me, that is insane, I never leaves that body until the Last Atom has turned Ashes to Ashes and Dust to Dust.

## Chapter 5.00

# Lightronics, Photonics, Trionics or Electronics

The next Step in Science is to move beyond Electronics into Lightronics, which is using Light instead of Electrons, so the baseline frequencies are much higher, so we do not need a conductor which limit is the flow on Electrons and is more susceptible to Electromagnetic interference, the Step after that is called Photonics, which is the use of Lightronics at the single Photonic level, such that Lightronics is the Energy source for Photonics, and Trionics is just the Science of using Light to replace the use of Electronics, so names I chose to describe this has not been used this way before, so do not confuse these word with any that are in use at the time of this writing, because I did not invent this words, I am just using them to explain a new Science, so we can add the word Trinary as a prefix to these words so there is no confusion, so we have Trinary Lightronics that is the replacement for Electric Power Supplies, and we have Trinary Photonics that replaces the components used in Electronics with ones that only work with Light, and this Technology is called Trinary Trionics.

## Chapter 6.00

# Trinary Sanctuary

I wrote a separate document called the Principles of the Trinary Sanctuary, but it was geared more to bridging the Gap between the Wizards, and the People and Sheeple that read it, so now I will define it in terms that Wizards can better relate to.

Once Wizards have their own Country which I call Trinary Sanctuary that is not limited by the use of: Money, Laws, Rules and Regulations to control People, then Wizards can Live in Freedom, and be Free to pursue real Science, and then Science can grow without the limited Resources that this form of Government for those Countries provides, but Country is not a very good Term to use, because Sanctuary is not a Country, it is a way of Life, but it must exist in an Atmosphere free of those Controls and People who believe in those Controls, and you can not mix Sheeple with Wizards, Sheeple are Dangerous and should be locked in padded rooms, so they do not injure themselves or others, and should never be allowed to interact with Wizards, they should never exist in the same Country, so I clarify the need for separation between people that are clearly insane with those that are not.

Once Money is abolished, all Crimes involving Money will slowly fade away, once Free People learn to live without Controls like: Laws, Rules and Regulations, and instead learn how to live with consequences, the word Freedom will take on a whole new meaning, but like all Constitutions that Humans have written only to be abolished without them even understanding how or when they became abolished, Sanctuary is just a Concept that People will never live up to, because People that are Stupid might turn into Sheeple, and then Paradise is lost once again, so Wizards never believe that they can Live with Sheeple and not Step in Sheeple Shit, because as long as Wizards allow Sheeple into their Domain, the Sheeple will take over, and Sheeple Shit will be the Foundation that Wizards must tread upon, so never allow People to think that thinking like Sheeple is tolerable, Wizards know that the Lightside and Darkside must find a way to live together in the World, but not the Same Country or under their Laws, Rules and Regulations, using the Money that is the Root of all Evil.

## Chapter 7.00

# Trinary Batteries

How we store Energy says a lot about our Technology, and our Technology says a lot about the Society that created this Technology, in any Society that allows the use of Money, must also deal with the Crime that Money causes, since it is the Root of all Evil because People Love Money, or they would not use it, so the Technology for Storing Energy comes down to Money, so whatever is more Profitable will always win, so Technology is only what yew pay for, so Advances in storing energy has a cost, it takes resources, and if those resources are Energy, then you need a way to store it for use, but that all comes down to Money, so Money must be taken out of the Equation, because Energy must be safe to use, and if Money is involved Crimes will be allowed to be committed in the name of God, because in the United States they print "***In God we Trust***", then allow the Blood of the Planet and Atomic Energy to be used, both are the Light of God, so they are Selling God and using God as a Slave, since this is not Free Energy, and only Dead Societies allow crimes like this to take place, both of these forms of Energy are Deadly to anyone that comes in contact with it, but Profit is all that matters to yew, so Crime is made Legal, so Storing Energy is a waist of time, because in this Future all I see is Death, and Dead People do not need to Store Energy for a Future that will not exist if they keep using the type of Energy they are today, in fact I can calculate that by 2060 this Society will be dead, and there is no Profit in that type of a Society, so let us instead talk about Free Technology, no so much Open Hardware because that always has a License, and I do not want any Licenses, so its Free of License, Free of Trademarks, Free of Patents, Free of any Laws, Rules and Regulations, but at the same time, it must be Safe and pass any inspection, in fact it should surpass the quality and set its own Safety requirements, so let us talk about Trinary Batteries.

## Chapter 7.01

### Philosophers Stone

My Cousin Isaac Newton said that the Light of God is Life because its in everything in the Universe, at the Subatomic level this Light is every Atom in the Universe, so Sir Isaac Newtons work on the Philosophers Stone taught him one lesson, Chemical Reactions can cause Energy to be Stored and Released, so this device can transform one type of energy into another, and it has been known that a Prism can divide Light into a Rainbow of Colors, so this is proof of this Transformation, we can transform this Light into Electricity and then transform that Electricity back into Light, Newton said that the Pyramids could transform Water into Fire and Fire into Pure Water, and that is how he said he could make Pure Water to prove this concept, but he needed to know the frequency, so technology was not advanced enough for him to prove this during his time, but that is not true in mind.

The Light and Dark energy in Sun Light has all the Energy this world would ever require, its just knowing how to Store in and then efficiently utilize that energy, and Nikola Tesla was the first to discover how to tap into the Energy of Lightning, he said its just a matter of finding a way to store its Energy, and that lead him to experiment with Ball Lightning, but it took me in another direction, I wanted to learn how to harness the Light, and only use Light as Logic to run all my devices, only converting to Electrons when needed to interface with the outer world I live in, so these Light Computers all run from a source of White Light, and the Philosophers Stone was what made me think about this concept, it is the very heart of the Technology since it will be the foundation for how the Light collecting lens will work.

When I was a Child I read the notes of Sir Isaac Newton and wondered what he meant by what he was looking for Alchemy was not there, most people believe the Philosophers Stone is about changing one type of Metal into another, but Newton did not know was that every Atom is made of Neutrinos of a Specific type of Element on the Periodical Table of Elements, so the concept that a Chemical could change that is not possible, and Newton found that out the hard way, then answer was not in Alchemy, it is in Electronics, but even there we can not change the Neutrinos of a Atom.

## Chapter 7.02

### The basic concept of a Trinary Battery

The basic concept of a Trinary Battery is taking a thermos that has a mirror sphere shaped container to hold Sun Light, so the material must not absorb any of the Light, so there can be no impurities in the glass or reflective surfaces, and it must have a 3 position rotary switch, one position will have a lens that uses prisms to allow Light in, but will not allow it to exit, like a one way mirror, you can not see the Light stored inside this container, because its storing it inside, and to do that it can not let any of it out, and must retain all of it, so the Light enters the lens and bounces off the insides of the battery's deflecting mirrors, so you will need to have thermal control so the vessel does not over heat, so encase it in a permanent magnetic field, such that the field keeps the Light from hitting the mirrors, thus providing thermal isolation. Now the second position is off, after you charge it all day, you store the Light on the inside, so the third switch position will have a connector that can be attached to a fiber-optic cable, which can then be used to connect to a Light Bulb to illuminate a room with Sun Light via a direct connection to the Trinary Battery via a Light cable, so you can now invent Light based devices like Computers, Monitors, replacing all Electronics, and even as a Light Engine for use in Transportation machines like Cars, Trucks, Airplanes and Helicopters, who knows, maybe we can even build a Space ship to get to the Moon some day.

I designed this Trinary Battery when I was a child in the 3rd grade, after drinking out of a Thermos I found a scientific instrument that can be used to collect Light, but I needed a valve that only allowed Light to enter and not leave, over the years I realized that this Light valve is possible to make with the technology of these days, so the design has not changed since then, and despite adults at the time thinking this is the stupidest idea they have ever heard, and they told me that when I grow up I will understand this, so I grew up to find that these Adults were just Stupid because they do not understand Light, because its possible to collect photons until the empty space in the container reaches its limit, and that is a lot of Photons that can be transformed into Electrons, making Electron Batteries obsolete, and these Trinary Batteries are actually lighter for the same storage density of Electrons, since no medium is required to store the Electrons, so this was my first invention at age 8 in 1969, but no one would believe me, and nothing has changed since then.

The design is actually not that hard to build, the shape can be a sphere or any shape that does not have 90 degree corners, I did experiment with Microwave tubes, and it does not work well in the spectrum of Light, so mirrors are required, also the Magnetic field is very important, so we can make flat flask shaped batteries for Laptops, we can make an EM shield and collect all energy to store in a normal rechargeable battery, so we can use these Trinary Batteries to produce Electricity, since we can store mass quantities of Photons which can be transformed into Electrons, its clear that Electron Batteries are not as efficient at storing Energy, because you can store more Photons in the same space then you can Electrons, so using normal rechargeable batteries is inefficient, since the Photons can be converted into Electrons, well you do the math, all the space can be full of Photons since it requires no medium that normal batteries require, it makes this type of Light Battery a better source of Energy then current Technology of this day and age, since you can mount these types of Batteries to existing buildings, and power everything in a modern industrial park, if you put two ports so you can charge and discharge at the same time, you can use if for an Electricity Generator, so these devices are handy, in fact you can go off grid, so the Power companies will not like this Technology at all, but that's what makes it exciting, do you think they will kill me before I tale anyone this Story?

No, they can just as easily use this technology to provide Cities with power, and do so at a much better profit ratio, so I would think the Power Companies will like this Technology, and so will the Banks, because that means more Profit, and no pollution and it is a renewable energy, and as long as no one gets Greedy, there can still be Free Energy for anyone that wants to build or buy their own equipment, so the concept is to go fully Electric with this new technology, so we can limit the use of the Blood of the Planet by only using it to make new plastic, and recycle 100% of all plastic products, and to eliminate the need for Atomic Energy.

## Chapter 7.03

### The Reality of Trinary Batteries

The Reality of Trinary Batteries is that no one has built one since the days of the Pyramids, but it does not mean we can not do that now, in fact I can show you how to build Pyramids, but I will save that for my Doctrine on "***The Principles of a Trinary Sanctuary***", it too will be a tower of Solar Collectors, and it will use these Trinary Batteries to power the World, but first someone has to build one, so that was the only catch, and those are famous last words, so it must be true, but the Logic is sound, and it is simple, too simple in fact, most people are still waiting for me to explain how to build them, when I already told you, but it was too Simple to understand, so you want Blue Prints and Simulators, and now this becomes a Project, and that is because you are going to build this Technology, all IAM going to do is explain how, Step by Step, so in this Step we talked about the Reality of it, we know that it should work just based on the simple logic of how we can trap or collect Sun Light in a contained space, but the only magic is the one way mirror, and the mirror surface inside the container, next to that finding the right kind of lightweight ceramic magnets is just a matter of trial and error, with a lot of design work that leads to a more efficient design.

Money will drive the market to build better devices, and some of that technology will be proprietary, but the designs from Trinary Sanctuary will not have a License, or maybe a Free License which means Free of License, so Companies are Free to use it, and Free not to share their hard work, so that others can use it for Free and even make Money from selling it, so it is a Free Market, but should not get in the way of Sanctuary providing the best solution to the Worlds Market, thus it will keep down research and development cost while allowing royalties to be paid to patent holders, such that it is not competing in an open market by having the Country where Sanctuary is located will get technology or products given Freely to that Country and it is that Country's responsibility to ensure that any proprietary technology cost get reimbursed and companies can make money just designing such technology regardless of who makes it, that way quality and price can run the market, and small companies can make a living just building products for sale based on designs that are Free, this is the only way it is a win situation for everyone in the World.

## Chapter 7.04

### How Light Travels

Light travels like any other Electromagnetic Field, in loops that return back to its source where it terminates, but this is science that I have not proven with Experiments, its just Logic, and that is where experiments need to be conducted prior to building one of these Trinary Batteries, we need to know how long a single photon of Light can bounce around inside of this container, my guess is about 16 Billion years, so this might be the longest experiment ever suggested in history, but that said, I calculated this on observations made by Edwin Hubble, who died before I was born, he called it the Red Shift, which is actually just Light on its return journey, since the Universe is not expanding, because if it was it would already be gone at the rate Hubble suggested, which is twice the speed of Light.

I also based this concept on Light only changing States once, so I have no idea how long it would travel knowing it will change States every time it bounces off a mirror, or encounters a Magnetic field, but I do know from LASER beam experiments, that it is a long time, longer then any test studies I have read, and as far as I know, no one has done a test to determine how long a White Light beam can travel, but its obvious that it will determine how long a Trinary Battery can hold a charge, so if you do the test make sure its in a vacuum and the mirrors are flawless, and there are other details I still need to talk about.

When we talk about Full Spectrum White Light from the Sun, we are also going to encounter Radiation from the Universe, so we need to figure out what Spectra of Light we need to collect, because we might find that its optimal to store just the White Light, and not the Radiation, so we will have to filter out the Radiation, we can also filter out Spectra that we do not want, because it may affect how long Light Travels, and the Container needs to be in a Vacuum and have a clean space free of any contamination, because just one drop of oil can absorb all the Light in the Container, just one microscopic surface that dose not reflect a photon will absorb all the Light in the Chamber eventually, so we need 100% reflectability inside the chamber at the subatomic level, so this is the precision level of the manufacturing, so how Light travels is very important to understand.

## Chapter 7.05

### Ball Lightning

In Nature Ball Lightning is proof that Trinary Batteries are possible, because of the physics of Ball Lightning itself, which is a magnetically sealed container of Light, so if you can produce Ball Lightning, you can use it as a Battery, so its Natures Trinary Battery.

Tesla said he could not figure out how to reproduce Ball Lightning, he spent all of his life in that one pursuit knowing how important it is as a power reserve, he thought that it could be stored in a containment vessel similar to the Trinary Battery charger that we have not talked about yet, but it will have a one way photon collector and an electrode for inducing an Electrically Generated Lightning or Natural Lightning, into the battery container to produce the Ball Lightning, this will provide the Electromagnetic Force Field (EFF) around the Light, and as long as you keep feeding it Light, and do not allow the EFF to become unstable by depleting the Light to a level that causes the EFF to collapse, you should be able to use this battery for long periods of time, at least 16 Billion years if Hubble was right, because the Light inside Ball Lightning only switches to the 0 State once, that is what Tesla said, but he could never prove it, but its easy to test, this is not a Sine-wave output, its more like Direct Current (DC), it will have a Positive and a Negative wave that varies in potential, but never crosses or enters the 0 State.

## Chapter 7.06

### Ball Lightning Theory

Ball Lightning creates its own Gravity and it will be drawn to the largest mass in its path, but Ball Lightning is rare, and no one knows where it comes from, and most of what I can tell you about it, is just theories, but unlike Newton, I have no problem writing about things I can not Prove as long as I tell you it is a Theory, so this is Ball Lightning Theory: Electricity needs a Ground for Electricity to flow, this is nothing more than Material that can channel power through the 0 Dimension, and since all Atoms have 3 States, its just a matter of finding out which Material provides the best Ground, as far as I know its Silver, Gold and Copper, but I have not done the test myself, but from Newtons work on the Philosophers Stone, I would say the answer is within the Stone itself, Crystal is found in space debris, it floats to Earth every second of the day, we call it Silica, or Sand, and it does not conduct electricity very well at low levels, but Lightning hitting it can cause it to burst into flames and causes Matter Lightning, this has been documented, and Tesla could confirme this, but it is not Ball Lighting, but the effect looks similar to the untrained eye, but looking closer we find Lightning always originates from Ground, and extends into the Van Allen Belt, but its effects are hard to see without any Atmosphere, but this is where Ball Lightning is produced in Nature, the Concept is that the Crystal concentrates large enough mass to channel Lightning causing the Matter Lightning, this produces a chemical reaction in the Atomic Structure of the Crystals which cause it to bind with other elements like Silver, Gold or other natural elements that are in the same space at the time, this provides a Conduit for the Electrons to flow through, so then all the Positive potential of energy is force to flow to ground, this is like opening a water valve in outer space, the energy will flow in a straight line till it hits another concentration of elements that are falling to Earth, this is what causes the Zigzag pattern of Lightning, the energy hits an element and changes states to 0, then it changes direction as its force to change between 1 and -1 after each State change, so in a fraction of a second when Lightning Strikes the ground, this potential from ground and the Van Allen Belt, forms a connection, and Radiation is allowed to travel down this connection to Earth, clearing the Radiation from the Van Allen Radiation Belt, and as this Radiation flows through this Matter Lighting, Ball Lightning is produced when the Radiation causes the frequencies in the Spectra of Light, which in outer space is from the White Light of the Sun regardless of if it is Night or Day on the Planet, and the frequency change causes the Light to separate from the Electrons, leaving the Electrons on the outside and Light on the inside, and that is how Nature makes Ball Lightning, but it will hang out in space before descending to Earth, so it appears not to be related to Lightning, but as Tesla pointed out, it is not Connected to it, meaning it is not attached to the Lightning, someone pointed out that not connected means it is not Related, but that is not the Truth at all, its reading into things instead of reading them, Tesla knew they were related, he just could not prove how, nor did he have this Theory, but his work lead me to this conclusion, he had all the pieces to this puzzle, I just put them together and came up with a Theory, but its somewhere to start if you want to prove it in a Laboratory.

From there the Lighting Strikes the ground while the Ball Lightning does whatever it wants, because by all accounts it will either float to Earth or out into outer space, these Balls of Light have been seen all over the world for centuries, people have even recorded them using video recorders, so the evidence is clear about the unpredictability of Ball Lightning, but its clear that it will eventually gravitate to ground if it enters Earths Atmosphere, and those that got close enough to it, like myself and my family, know it has its own Gravity, and know it is a very bright Light like a small Sun, and the surface looks like its glowing, and when it hits a steel screen door it will go right through it if it is not Grounded enough, just to find a better path to ground, and when it does watch out, it can burn your house down, and it makes a super sonic pop when it hits ground.

This theory is where I would start to experiment with making Ball Lighting, only I would do it in a Laboratory, where it can be preformed over and over, so it is a starting point, but frequencies and spectra of all types of energy will be required at very high voltages, so if we can create an Atmosphere of Crystals, Silver and Gold, and have a Lightning Generator pass a current through a Trinary Battery at the point where the Ball Lightning is created, then we can trap it inside the container, sounds easy enough to do, and for those that understand the Magic of Electricity like Tesla did, would be right at home with this type of Technology, because once you start a Trinary Battery, it should hold a charge for Billions of years, but if you break it, you need to have a safety device to ground it, and also this device has its own gravity, so how we used it to navigate with, is another part of the technology I will need to discuss, but for now this is just a Theory and not Reality, but if you want to work with the power of a Sun, you will have to prove this Theory first, but its clear that this will be the most powerful Battery ever created.

## Chapter 7.07

### Ball Lightning vs Light

Ball Lightning vs Light for the Trinary Battery gives you two options, the Ball Lightning is very dangerous, but very powerful, it has its own Gravity so for outer space travel its required, you cannot leave the Planet without it, because Life requires Gravity, and it requires the Light, and Gravity pulls the Light to it, Gravity is actually just Ground, the Light is pulled towards it, so the effect of these produces the Gravity, but Ball Lightning is very powerful and with Power comes danger, so Light storage is much safer, so the usage will very depending on what your requirements are, for example: you would have to be insane to use a Ball Lighting Trinary Battery in a Laptop Computer, but a Light Trinary Battery is safer than Electron Batteries, so usage is the determining factor, for Transportation a Ball Lighting Trinary Battery is a better option, if you crash it will be grounded, and you are inside a Faraday Cage, so its safer than engines that use fuel, but it has limits to how much energy it can sustain over time, but as long as you are charging it at the same time, which can be done by various technologies, like Solar, Satellite, direct line of sight beam transmissions, which is just a dish tracking an object, and that object being the receiver that feeds the Light back into the Trinary Battery, so this can be Light or any spectrum of energy that can be transformed into Light, so this technology will work for both types of Trinary Batteries, on ground this is easy, during the day you have Solar, and roads can have energy grids built in, in the Air Satellites or Beam Transmissions are an easy solution, in Space the Sun is the only source that will work, so as long as you stay within its range it will work good, but it has its limits as you move away from it.

Ball Lightning can be used for Gravity, in any Transportation device this ability can be put to good use, not sure we could build a Trinary Engine using this Technology, but that is where this is going, the only difference is the Shell, if a Ball Lightning Trinary Battery forms a Neutrino shell, then it will become a Trinary Engine, at which point, Navigation will become a real problem, for a space ship this would be required, but for a Car this is a problem, we do not want a Trinary Engine, in fact, Gravity that Ball Lightning produces is not enough to move the transportation device would be my guess, it has Gravity but it would be based on its total mass, so it would be a fraction of the Planets Gravity, otherwise Ball Lightning that enters a Planets orbit would be able to escape the Planets Gravity, and all evidence proves that the Planet has more Gravity, since it has more Mass, I say Planet, because this would be true of all Planets regardless of if it had an Atmosphere, so it would be just as true on Mars, as it would the Moon or the Sun for that matter, but it would not take a very large Trinary Engine to be able to move away from any object that has a Trinary Engine in it, so the Galaxy might be pushing it, meaning you might not be able to use one to escape the Galaxy, even the Sun of that matter, because of its Mass, but a Planet or Moon is doable, I would say a Trinary Engine the size of a basketball would be enough to take a Spacecraft to the Moon or even Mars, but a Ball Lighting Trinary Battery could provide the Gravity all Life would require if it wants to live in outer Space, so this is what NASA needs to make its trip to Mars, creating a Trinary Engine in outer space is doable like I said, but not on Earth, the list of things that can go wrong and destroy this Planet should be considered when trying to make these Engines, it is not a matter of if can we, its should we, because knowing what it can cost us is not something to gamble with, it is not our Planet to destroy, and these Engines are not toys, the Batteries are actually much safer than any engine in use at this time, but the modulation caused by the Electrons around the Ball Lighting, make it impossible for Neutrinos to collect, because the Electrons around Ball Lighting do not cross nor enter the 0 Dimension, it does not even change States to 0 unless it needs to change direction, so do not allow it to do that, you need the Permanent Magnetic Force Field to keep the Electrons from hitting the glass, if it does contact it, it will cause it to change States, but only at the point one Electron comes close to contacting the glass, at the subatomic level that meaning of close means they do not actually come into contact with the glass, but it can not flow through the glass, not enough power to ignite it, and it is non-conductive, making this the perfect engine, but it is not a Trinary Engine, its just a Trinary Battery.

## Chapter 7.08

### Dreams vs Dream

Most of the things I talk about came from Dreams, and in my Dreams, things seem real, so real that when I wake up, I would wonder if it was a Dream, other times I confuse what was a Dream to what is real, so I must admit that all the Technology I talk about dealing with Trinary Batteries is just a Dream, but Dreams can become a Dream, and the two are not the same thing at all, Dreams happen when we are asleep, it is our subconscious mind at work, but when those Dreams become a Dream, we mean it becomes our Goal in Life, so it becomes our Reality, and when Dreams become Reality, then you know you are Schizoaffective, but still, it does not mean it is not Real, so Logic proves that what my Dreams were telling me was Reasonable, but it is not Real till you make it work, so Trinary Batteries are not Real, they are just a Dream, but to ask others to have the same Dream is a very strange request to make, but to tell people this is just Technology that was lost over the years sounds crazy, but Newton said that the Pyramids had advanced technology, and that they had Lights, during his time they only had candles or fire, so Technology was lost, the ability to fly to Mars to built Pyramids is proof of this lost Technology, and the Pyramids could not have been built without the technology to fly, since all the Stones came from hundreds of miles away, and another Wizard by the name of Edward Leedskalnin who built the Coral Castle in Florida around 1923, used similar means of lifting and cutting stone using machines known as Host and chain saws, technology we can buy in a hardware store nowadays, but still, Edward had Dreams and he made those Dreams his Dream and built it to prove he was right, but few got it, but he made a living giving tours of his Dream he called his Sweet Sixteen, so Dreams can become a Dream and can become Reality.

My Dream is also to build Pyramids, but not like any that exist today, these stand 66,666 feet in height, which is the limit of my technology, and can generate enough power to run an entire Country, these are power plants, and Trinary Batteries are at the heart of them, so its Technology that needs to work, and not just because I would look like a fool if they did not, because let's face it, no one has ever built a Trinary Battery, and just because I say its simple and the instructions sound simple enough, even the way they operate makes sense, so there must be something wrong here as my High School teacher told me, because if it was that simple someone would have built it already, and that is why my Dream is just Dreams, because this can not be anyone's Dream until it becomes everyone's Dream, and for that to happen a major paradigm shift must take place in Society, and those things we were taught in school were just things that they taught us to crush our Dreams, because General Relativity and the Godless Dynamic Universe is Science Fiction, it does not work, so it is a future of failure, and People who say IAM just Dreaming sarcastically, have no such Dreams as grand as this, so they have no problem destroying the Dreams of others.

I put my honor on the line with this concept that I have never been able to verify because of the lack of resources to do so, but I am so sure its possible, that in my mind it is the only thing that is possible, so Einstein's Theories are not Real, Einstein did not believe in them so why should I, in fact he believed in Newton, and I believe in Tesla, Franklin and Newton, so if they were right then so am I, and that is where this Dream becomes my Reality, because the way this World is going, World War will soon break out, if it has not already, but the answer is so clear, build it and everything will just work out, and that is a field of Dreams, so it must be the truth, everything happens for a reason, and every reason has Logic, and if that Logic is so undeniable as His-Story is, then this logic and reasoning must distinguish between Dreams and Reality, Tesla's work was thrown off course by endless streams of disinformation, Tesla knew Electricity was the Light of God, he knew just like Franklin that the Light of God was in Lightning, and Newton knew that the Light of God was the Force in Gravity, and all of these men proved it, but still people doubt me, they say I am a long haired Autistic Schizoaffective pot head, as if that was a bad thing, because at least I know what the Light of God is, because God is the Light, and the Bible tales me that is so, so my honor is on the line if I cannot build this Trinary Battery, but this is the rub, what if I can, then how will this World change?

There is not enough Money in the World to build Trinary Sanctuary, so that Dream is just a Dream if Money is involved, but take Money out of the equation and but God into it, and then that Dream has a chance to become everyone's Dream, and what a Dream it is, imagine a life where no Petroleum is used as a fuel, and Energy is Free, meaning it does not cost Money, you live in a World where there is no War, because all Wars are always about Religion, Money and Power, so this is a place with no Religion or Money and the Power is Free for everyone, you might live in a Pyramid or a City outside of Sanctuary, but as long as you are a Sanctuarian you are a Member of a Militia that maintains Sanctuary, and non-military or anti-military people think that a Militia is a bad thing, but in Reality its just People who join together to defend a way of Life,

and that way is not governed by Laws, Rules and Regulations because it is not about Punishing people who break those Laws, because we do not judge in Sanctuary because we have no Laws, just a code of ethics and technical orders and data that explain step by step how to do everything that is required to maintain Sanctuary, so it to is a very simple Society that is based on following technical orders instead of orders handed down by people who only care about Money, instead these orders are written by the people for the people, and Money is never allowed in any form, so corruption is not possible you must use a computer system that is public and private, but does not hide or keep secrets about what is going on in Sanctuary, because it is not everyone for themselves, its everyone working for the same goal which is to live Free, meaning without Laws, Rules or Regulations, without voting all your Grandchildren's Rights away, without classes, races or hatred, which means no Religion because that is a Hate Crime against Free people, its Slavery, and only Slaves get paid Money, Free people have no need for Money, and there is not enough of it to build Sanctuary, so there is no reason for these two Societies to co-exist in one place, but it is possible, but both societies would have to agree to disagree about everything, so the Land Sanctuary is build is only for Sanctuary, but its excesses energy must be Free to all, so it is the job of Sanctuary to provide the World Free Energy.

## Chapter 7.09

### How much will it cost to build a Trinary Battery

I would not try to get anyone to agree on anything, it is a waste of time, the World is going to fall apart for many reasons, global warming is melting the Ice caps which will cause the Oceans to Freeze over, causing an Ice Age, so anything else is just a distraction, but the Reality is that no one has the Money to invest into Trinary Batteries unless they can make a Profit because it is all about Money, so why would I want to waist my time so others can get Rich?

Stupid questions should go unanswered, but I do not give Stupid Answers, so the truth is that Sanctuary is about Free Energy, so for a Company to invest Money to sell the Products that I just gave all the details how to build them, would be a waist of Money if Sanctuary was allowed to be a Dream and that Dream became a Reality, so these Companies will destroy my Dreams just to make a Profit, and to make the Slaves pay to use the Light of God, and that is just wrong on way too many levels, in fact that is just Evil, and proves it is the Root of all Problems, no Money not as much Crime, so Money is the Darkside, so I ask Companies to invest in Sanctuary instead, do the research and development in the name of Sanctuary, and when Sanctuary becomes a Reality, Society will change, the Darkside and the Lightside will learn to work together to save the Planet, or at least save the Life on the Planet during the Ice Age that I can guarantee you will come some day, so for now I say let these companies make their profit, this technology is Free, that means its Free for any Company to build and Sell, and they are Free to not share their plans with us, this is not Open Source, it has no License, its Free, so they do not have to give us any profit, and that is how Free works, I ask for no Money, in fact that is all want is a Society that uses no Money, Sanctuary does not want your Money, in fact we can not accept it, instead, we will build Trinary Batteries and provide the Entire World with Free Energy and everything goes through the Governments of the Countries housing Sanctuary, and it will provide the Country with all its excess Power and Resources that they will deduct the cost from the National Debt, which they themselves will assign the worth of those resources, so there are no conflicts or need to negotiate a price, the concept is simple, the people who join Sanctuary will work in a Militia that will protect Sanctuary from people who would steel from it to sell for Money, so they are the workers and protectors, so there is no need for Police of Military, the People are in charge of everything, and they build Sanctuary for their Children, and those Children are born into the Militia we have no Civilians, this is not a country club, it is a way of life, it is not the Military, we do not fight Wars nor do we participate in them, Sanctuary is about living a safe life where Freedom allows inventions that we give the world for Free, we live a life of Luxury instead of one of Slavery to the Banks that own us, we take care of each other, one Language, one belief, which is very simple, we believe in the Light of God called Trinary Energy, our Science is our way of Life, so its Trinary Science, no Laws does not mean Chaos, it means we go above all Laws, Rules and Regulations, we set our standards so high that only the Light of God can do better than us, we design and build high tech devices, the world can build and sell them if they want, we do not compete with them, we just make sure they get Free Energy and in exchange we get our Freedom, keep it Simple.

My Logic is solid, the concepts are easy to understand, the technology is in our grasp, but it all comes down to who builds it, if Sanctuary builds it, all the Power is Free, not the power lines bring it to your homes, the power companies still own those, and the banks still own your land and you, so Reality kicks in, this will never change for those living outside Sanctuary, but if Sanctuary is not allowed to exist, then this will be true for everyone, and everyone must admit they this is a Slave Planet, and in 2060 this Planet is void of all Life, so I will be dead by then, so what do I have to gain by anyone of what I have said?

Freedom is not just a Dream, it was once a Reality in the United States after 1776 when the British Bankers owned it and before 1863 when they took it back, so why build Trinary Batteries if it will cost a lot of Money, when you can just allow Sanctuary to exist and get all the Energy for Free?

A Dream is just a Dream until it becomes your Dream, and that was the Dream in the United States, but Sheeple are funny creatures, and those Dreams did not mean as much as the Promise Money came with, but I would rather put my Trust in the Light of God then Money, so how much will it cost to build a Trinary Battery is up to you, personally I would opt to build it for Free.

## **Chapter 7.10**

### **Construction**

Construction of the Trinary Battery is based on Dreams, but these Dreams are also based on Trinary Science, so let us talk about how my Reality fits into my first design which I did at age 8, by the time Fiber-optic or Optical-Fiber cables came out, most of its uses were in toys, so this design will have a glass sphere with a one way mirror I will call the Philosophers Stone, which will only allow Light into the Sphere, and the Mirrors will cause the Light to bounce around for a long time until they are allowed to exit into the connector that goes to a Optical-Fiber cable, note that Fiber-optic cables are used for data transmissions, whereas Optical-Fiber cables are used to transfer Light, so this cable will form a Flashlight wand attached to the sphere.

## Chapter 8.00

# Lightning Collectors

Lightning Collectors are simple to construct, first you need a Lightning Rod, in large cities, you will find plenty of them on top of the tallest buildings, all you have to do is electrically isolate them from Ground, you can do this by making a special conductor that was designed to transmit Lightning long distances, you will want to have it go to ground at the very end of the conductor, and have a contact switch that will disconnect the ground when energy runs through it, thus forcing all the energy to drain through all the Lightning collectors attached to, then connect all your Lightning Collector Devices in parallel, these devices can be anything that can absorb the Energy from the Lightning without being fried in the process, so they need to be able to handle the amount of energy you allow to pass through them, so I would suggest very high-powered electric capacitors, you can attach them to the conduit and put a limiting circuit between it and the ground, and it needs to have a contact switch to disconnect the ground when the capacitor is full, so that you can limit how much energy can flow through it, then you can use that power, and charge up batteries, such a simple idea, yet no cities are doing this, and the reason is because of their Ignorance of Lightning.

# Chapter 9.00

## Light Circuits

Currently most Circuits use Electricity instead of Light as an Energy source, and Fiber-optics is only converting Electricity into Light, and back again, so Light Circuits only use Light as an Energy Source.

If you manufacture a silica or glass circuit that has channels that are just big enough for one Polystyrene Molecule to fit into, such that the Molecules Static Charge prevents it from physically coming into contact with the channel, a Light source can be used to move the Molecule, so you need one channel for the Molecule and another channel that is too small for the Molecule to move into, so it can read the state without changing it, as such you only need a path or channel that sits to both sides of the Molecule, one to set it to an on position and the other to set it to an off position, thus making one Light Gate.

Light Gates are comprised of two channels, I used the term Channel, when the properties is similar to fiber-optic, only smaller, one channel is large enough that only one Polystyrene Molecule can fit into it in a way that its Static Charge prevents it from coming into contact with the channel, the other channel is just small enough that Light can pass through, but not the Molecule, and its Static Charge prevents it from moving, as such the Gate forms a cross road for the path of Light traveling through it.

Identifying the parts of the Circuit, we have the Polystyrene Molecule Channel as seen in: [Illustration 9.1: Polystyrene Molecule Channel](#), note that I will add features and names so look for changes in previous illustrations.

**Illustration 9.1: Polystyrene Molecule Channel** [Full Size](#)

The Polystyrene Molecule Channel is like a Fiber-optic cable in the way Light moves through it, the Polystyrene Molecule has a static charge that prevents the molecule from coming into contact with the channel, so it can move without friction.

The Set Channel is also like a Fiber-optic cable, it feeds Light to the Set on or Set off channel as seen in: [Illustration 9.2: Set Channel](#).

**Illustration 9.2: Set Channel** Full Size

The Read Channel seen in: [Illustration 9.3: Read Channel](#) is also like a Fiber-optic cable, to read the state of the Gate, Light will pass through the Read Channel, if the Polystyrene Molecule is blocking the channel, it is in the Off State, if the channel is not blocked it is in the On State.

**Illustration 9.3: Read Channel** Full Size

The Polystyrene Molecule as seen in: [Illustration 9.4: Polystyrene Molecule](#) is inside the Polystyrene Molecule Channel, as stated it has a static charge that prevents it from physically contacting the channel itself.

**Illustration 9.4: Polystyrene Molecule** Full Size

Setting the Gate State to Off as seen in: [Illustration 9.5: Setting the Gate State to Off](#) is accomplished by applying Light to the Set Channel Off, and removing Light from the Set Channel On, to read the State you apply Light to the Read Channel, the Polystyrene Molecule blocks the passage.

**Illustration 9.5: Setting the Gate State to Off** Full Size

Setting the Gate State to On is accomplished by applying Light to the Set Channel On, and turning the Light off on the Set Channel Off, now the Light can pass through the Read Channel, note that Light can also flow from the Set Channel on to the Read Channel, since the channel is getting Light from two sources in this State. See [Illustration 9.6: Setting Gate State to On](#).

**Illustration 9.6: Setting Gate State to On** Full Size

The Logic Gate Symbol as seen in: [Illustration 9.7: Logic Gate Symbol](#) shows that the input for A and B can never be the same, you have to turn one on and the other off, so it will take many gates to create a Binary State Gate like: AND, NAND, OR, NOR, XOR, XNOR, NOT, or other types of Gates including Trinary Gate Logic, which has 3 States instead of 2 States like Binary Gates, this is useful for Fuzzy Logic, or determining if a gate has been set.

**Illustration 9.7: Logic Gate Symbol** Full Size

It should be clear from the illustration that the State of A and B act like a push-pull circuit, the lack of Light on one side and the presents of it on the other side is what moves the Polystyrene Molecule to the correct position.

My guess is that the Polystyrene Molecule will need a very strong Electromagnetic Force to change its State, the Light should hold the State in place, so the Light must be constant to hold the State in the On or Off position, as such, I would theorize that it would be immune to an Electromagnetic Pulse AKA EMP, making it idea for Space travel, where its likely to encounter strong Electromagnetic Fields.

# Chapter 10.0

## AI, TAI or Atl

Artificial Intelligence or AI, is the most misused word in Mainstream Science today that I know of, besides the word God, which the Bible defined as All Light without Darkness, so God means Intelligence in terms of Light as the Logic and not the Artificial kind, so the Term Intelligence is what comes into question: but in the World today it is all about Money and Marketing, and that is why the Term God has little use in Science: since God is a Marketing tool for Religion, so instead of talking about Marketing Propaganda about AI, I will instead talk about Trinary Artificial Intelligence: TAI for short, or Artificial trinary Intelligence: Atl for short, and that little **"t"** is for Trinary, as in Trinary God and Trinary Intelligence, it is the same **"I"** as in **"IAM"**, because IAM Intelligence, and I like to rename every concept I talk about, so you do not confuse AI with TAI or Atl, they are not the same, because of how I define them, and that is why I renamed them. In Trinary Science we must learn to view all Technology as Artificial, yet the Hype about AI is so overrated that its goal is undefined, so just to be Crystal Clear, this chapter is about Trinary Technology, no need to short that, this is about defining what Artificial Intelligence is, and how Trinary Technology will be used in Trinary Sanctuary, to build systems that are intelligent enough to protect systems from failure. What is AI? This is a complex question, so step by step I will define what terms I will use to describe AI, and what Evidence I used to prove it, then I will describe an Atl Model, and describe how to build Atl Circuits, using Light Circuit is theories from the last Chapter: 9, thus proving how practical it is to use Light instead of Electricity.

Artificial means other than Natural, so it describes a Machine... Trinary is 3 State Logic based on the Trinary Math of  $(+1) + (-1) = 0$ , so it has 3 States:  $+1$ ,  $-1$  and  $0$ , and we can give those States Names like: Matter, Antimatter and Null Space, or Light, Dark and Invisible, or  $3^{\text{rd}}$ ,  $1^{\text{st}}$  /  $2^{\text{nd}}$  and  $0$  Dimension, or the Father, Son and Holy Ghost Spirit of Mother, or Heaven, Hell and Earth, all in that order, and Intelligence describes who IAM, so it is the same **"I"** that is the Light in Me, and Me is short for Meat so it is the Flesh, so this is the Intelligence of the Flesh, and a Circuit Board can also be described as the Structure of Artificial Flesh, so its clear these terms describe Atl, because Trinary Math describes Trinary Intelligence, according to Sir Isaac Newton, God was the Force in all his Equations, so its clear that Newton believed God was Energy, because he also believed God was All Light without Darkness, so this is Newtonian Science, and I only changed the Names to define it as Trinary Science.

Intelligence is something you must have in order to understand it, because its what allows us to think, so most people think that means Brain Tissue, when in Reality that was just a Theory, as was the idea that Memory is encoded into Neurons in our Brain Tissue, we have no proof that is true, but we do know that the amount of Neurons written does not increase in proportionally with the amount of memories stored, meaning our brain takes about the same amount of time to write those memories to our brain, and the space it uses us does not increase due to more things to remember that day, yet most people assume it does, and why I had to rename AI to Atl, because AI is based on Money Marketing Propaganda, whereas Atl is based on the Galattice, which was defined as the Galactic Brain of the Universe, since it actually stores all thoughts for all Living Beings, including: Animals like Humans, but also Insects and other life forms, because humans are not divine, they Evolved from single cell organisms into Plants, then insects, then Animals, then Apes, then to the Human lifeforms that we are today, so its only through Trinary Science and His-Story, that we can make sense of Science and History, but its only how we define these events that describes Intelligence, do we understand what it is, and that all comes down to who you are and who IAM.

They say a Picture is worth a Thousand Words, so the Picture I want to talk about is the Matrix, this Picture was great, it was written but the Wachowski Brothers who are now Sisters, so it has its Lightsides as well as its Darksides, its just how deep you go into the Matrix do you understand what it is, and how they access it, most people view it as a Computer Program, in the Picture its just Hardware and Software, and that is how most people view our Brain, as if the Brain was the Hardware, and our Thoughts were the Software, so to them, this is AI, yet the Sentinels can not read their Minds, it can only track where there are in the Matrix by using Technology, so all the People plugged into the Matrix still have Freewill, yet the Oracle has limited access to our thoughts, but still does not read our minds, and when Neuro crosses that boundary, and crosses over from being in the Flesh, to being Electricity or Light, so Neuro like Neurons, brings up the concept of how Matrix People believe our Minds work, and for the most part this is Science Fiction, yet on some level I can relate to wanting to have a Matrix to Plug into, and I do believe this type of Technology is possible, but more to the Point, I need a frame of

reference to discuss the Galattice, and this is the closest Picture I could find, how many words it saved me is another issue, because AI always has a Rabbit Hole to go down to the next Step.

Our Brains act like a Filter for Light or Electricity, what we put into our Bodies effect this Filter, and all our Senses are Electrical in Nature, our Eyes work similar to Camera lens, our Ears work similar to Microphones, our Skin acts like an Electromagnetic Field Detector, without us even being aware of it, our Nose works similar to a Spectrum Analyzer, and each convert what it: sees, hears, feels, or smells to an Electronic Signal, also known as Trinary Intelligence. This Trinary Intelligence is a Signal that has a Frequency and Wavelength, and each ride on the same carrier waveform that our Body Generates, as such: every individual has their own Frequency and Wavelength, it connects us to the Galattice, and allows us to have Freewill till the day we die, at which point we are open for all those that are dead to experience as a memory, because in the Beginning there was only the Light of God, and now we are Gods Dream or Nightmare when we die, and it is why people that have a similar Harmonic Signal, tend to think the same. This Intelligence Signal can be measured and recorded, using the Technology of today, so it can be verified and experiments can be repeated, and are repeatable, so this is Empirical Evidence, so this is also a Sensory Experience, as well as Signal Analysis, which gives us Physical Evidence that this Signal Exist, and we know its Intelligence: because it is our Brainwave, so this is not Magic, its Science, and our Brain is just a Filter, and first I must explain how this Filter works.

A Filter is an Electronic Term, it means to Alter the Signal in a defined way, for example: without a Filter, our Brain would have no way to tell how our Body feels, it sends out pain signals that others that see them, can feel that pain, so we can feel the pain of others using the Filters in our Eyes. Other Brain Chemistry alters this Filter, for example: it can apply the Blue Filter, and you will wish you were dead and sing songs about the Blues, because what we drink and eat changes how we feel, yet this is all Electrical Signals that are being Converted from a Physical reaction. A Filter is used to remove all but those Signals we wish to interact with, so if I look at a Brainwave, I see what the Body is doing, its like trying to decode the Matrix, there is way too much information to decode the Human Body using a Computer Construct, not in Real-Time anyway, but using Filters we can look at just one or more Signal that are riding on the Carrier Wave of our Brain, this will allow us to map out the Brain, and that Picture would be the Planet of the Apes, they cut open your head and cut out parts of your brain to figure out how it works, its like trying to reverse engineer technology you have no idea what it is. A Filter is just some mechanical system for our Body or Artificial Body, to listen to and react to all the signals on its carrier wave, so if you look at a human brainwave, you will note it has a Signal for every body function it can preform, and the once that signal is made, it just works or it does not, for example: when the Signal tells the Body to move a Finger on a Hand, the brain sends out the signal, and regardless of if you have a Finger, Hand, or Arm, your Mind will feel it, as if it was there, even if it was not, and it is these filters that we can control with our minds, so we can filter out pain, without the need to use Drugs, although this works best when using Cannabis, my point was that we can learn to do what these drugs due to our Mind, and Electronically Mimic it, so we can create Electronic Devices that work like Drugs, all they have to do is filter out those Signals that relay Pain, so this is what we need to talk about in sub chapters to come.

I could show you thousands of images of Brainwaves and try to decode them for you, but that is not my field of study since I do not have the equipment to do so, nor did I have it to map out the Brain of any life-form, but once you map out one, the rest are almost all the same, we have more in common with insects then we would like to believe, so maybe those pictures would be worth a thousand words, but are beyond the scope of AI or Atl, which is just to prove that this Intelligence Exists, then prove it can be done Artificially, and we all know that Brainwave images and studies is a field in itself.

The Mind and Brain are not the same thing, most people know this, but few understand why, for example: we all know our Brain is just Chemistry, and for the most part, its Electrical in nature, all our nerves transmit electrical impulses, our entire body works form electrical signals transmitted via nerves, and electrical conduits like Blood Veins, and it is why we have so much Iron in our Blood, without it our Energy could not flow, because its picking up Electromagnetic Energy from the Earths Magnetosphere, the stronger the Magnetic Field, the more energy your body can generate, and it is why if you try to fly in space above our Atmosphere but inside the Van Allen Belt, you will live in a low Electromagnetic Field, and your Muscles will weaken to the point of atrophy the longer you live there, so we must understand how Electromagnetic Fields and Electricity effects our Brain. It is clear our Mind is not in our Brain, meaning who we are is not stored or encoded as Neurons in the Brain, those are just Pointers to the Galattice, if our Memory was stored as Neurons they found die when the body dies, not that the Flesh dies that fast, but Neurons seem to die the second Energy stops flowing through them, and the proof that we can bring people back from the dead using Electricity, is proof that the Mind is not in the Brain, it is the Electricity

flowing through it, although the longer we were dead, the more brain damage it causes, and then our Filter does not work very good, so Mental Illness is really just a malfunctioning Filter, and there should be a way to Electrically fix it, by repairing the Electrical Connections, which comes down to taking our Vitamins and Minerals that conduct Electricity.

When we have a thought or see an image, and we store that Memory, we have many ways of storing it, first we live only in the Moment, so all Memory is stored Momentarily, then its moved into Long Term Storage, this involves creating a Filter for it, this is done by growing a Neuron that encodes this Frequency and Wavelength, as a Neuron, we have proof of this, it only activates when a specific Frequency and Wavelength activate it, so we can filter it out of all the other memories stored in the Galattice. So what happens when a Micrometeorite hits you in the Head, and after almost Bleeding out, I can tell you from experience that you will not remember what happened up to the point you got hit, to the point you do not remember what happened, to the moment you remember weeks from then what did happen, so Temporary Amnesia is something that I have experience, but does not explain why I explain things the way I do, and thinking about it means I have to relive that moment, even if we could find that Memory and burn or cut that Neuron out, we could still find that Memory if we searched the whole Galattice, so Long Term Memory is just a Filter, much like an Index to find things faster, but you can rebuild your Indexes, so you can rebuild your Memory, but like I said, it can be very Painful, but you can not delay the inevitable, so even if that Information is not written to the Brain via a Neuron, one day you might find that Memory when looking for another, since its just an image that has all our thoughts, feelings, emotions, sounds, sights, smells, and other sensations, all wrapped up in a thought we had and stored in the Galattice, and all of those are now potential PTSD Triggers for me, because if it was not stored there, you could never recover that memory, and once you do, you can never get rid of it, so be careful when looking for things in your mind, or trying to find things that you know you should not talk about, our Memories are Private for a Reason, but once we are dead, we cannot defend our own Thoughts, so they become Public Domain, so this takes Karma to a new level, our Freewill dies with us, and all our Memories that were protected by Freewill, are now Free to Resurrect, so be careful about what you see, because our Memories really are out there for others to connect to, so be careful about what you watch on Videos, they can become Memories, especially after a Traumatic Brain Injury, and people that have them know more about them, then people who have not, there are some Knowledge you only gain by Experience, and some Experiences you just want to take others advice not to try this at home, it seems I pass out more offend nowadays, waking up wondering what happened, sometimes I wonder if it is just me remembering that one event over and over again, because that is a Memory loop, or PTSD Trigger point, and malfunctioning machines can do the same thing, so there are problems with our connection with the Trinary Energy, even in a healthy body, so just like Humans can get a Virus, so can Computers, and it all comes down to how we access this thing I call Trinary Intelligence, so it comes down to Images that have Sight, Sound, Smell, Sensations, and Sensitivity, that are linked in our Brain, to thoughts we store in the Galattice.

Intelligence is no more than an Electrical Signal: that has all the Data that is required to store all the information needed, as such: to be able to call a device AI or Atl, it must be able to take this Signal and filter out this information so it can act on one single signal in it, and for the most part we have all kinds of Technology that can do some of this, for example: we can play Audio and Video Recordings, and our brain can record that Audio and Video, and we can play it back in our Mind, so there is a fine line between a Machine that can can play an Audio or Video file on demand, and what we can consider AI or Atl, I only distinguish between them by the way we define what Intelligence is, so we have Cable TV, it has multiple signals and has the intelligence to separate them into channels, yet its still not AI, so what makes any device AI or Atl is when the Electrical Signal can make decisions of its own, as such the device itself is passive, it does nothing but process the signal, it does not run a computer program to run instructions encoded in the Signal decoding, it only has the ability to separate the signals in a way that they can access the information, much like our bodies do, without any Signal we are Dead, we get a signal for our Heart to beat, this Electrical Signal can be Filtered out of our Brainwave to prove it exists, if you turn it off, the Heart will not beat, so if a Machine can mimic this behaviour, then it is alive, and AI or Atl, its really not that hard to do, its Technology we do not have right now, but we are capable of creating it, so now I will talk about one way that I understand this Technology to work, and that comes from my Dreams, and some Dreams do come true.

To fully understand a subject we need to break it down into steps, we will call these Sub Chapters, so currently we are in Chapter 10.0, and 10.1 will explain the next Step.

# Atom

## Atom, Trinary

An Atom is what Sir Isaac Newton called "**Atomos**" based on what the Greek philosopher Democritus wrote about back around 466 BC: stating that Atomos was a piece of matter that could be divided and continue to be divided till eventually you could not divide it anymore.

Atom's have 3 State Change: Solid, Semisolid, and Invisible, so just like Atomos, this division has 3 States that define this Division: Solid is the Matter before you divide it, Semisolid is the Matter as you are Dividing it, and Invisible is Matter when it can no longer be Divided, this is what Sir Isaac Newton called "**Trinity**": The Father, Son and Holy Ghost or Spirit known as Mother Nature.

The Atom is created by the only 3 things that exist in the Universe: Light, Darkness, and Neutrinos. Sir Isaac Newton believed Atomos was what God was made of.

# Antichrist

## Antichrist

The term Anti means against, the term Christ means Deity or Spirit, which is an Entity that does not Physically Exist, combined the term means those that know that Christ was Inserted into the Bible during the 3<sup>rd</sup> Century, this would mean that they did not believe Christ was real, in fact they believe Christ is a Lie, People who are Antichrist are against the Term Christ, since it is a Lie that was inserted into the Bible to make Jesus appear as two People, because there is only one Jesus in the Bible and Sinners Deny his Name 3 times: Jesus Bar Abbas, he was the Person who fought against the Roman Empire for their Use of Money and Taxation, which is still going on to this day, because of the Sin of Denial and the use of Money.

The 1<sup>st</sup> Antichrist in History would have been Galileo Galilei, he would have been burned alive or exiled if he had not changed his mind about stating the truth about Christ, as would have the 2<sup>nd</sup> Antichrist in History: which would have been Sir Isaac Newton and the 3<sup>rd</sup> Antichrist in History would be Jeffrey Scott Flesher who wrote this book, and he is sure that some Insane Religious person would kill him for stating the Truth, but this is Science and that means it is all about the Truth, and not some stupid belief that there were two Jesus's and two God's in the Bible, that is just for Stupid people to believe, and they will always kill in the Name of Jesus or God, because they are Sinners and do Evil things.

For the Record: Being an Antichrist is a Good thing, it means that you do not believe the Lie that was inserted into the Bible to make Money a lessor Sin, as if you can have a lessor of two Evils, because it is about owning up to the Truth, and not defending a Lie, it is about the Truth and that Truth is the Light without Darkness, and that is God according to Sir Isaac Newton, Christ created a Paradox in the Bible, it had two Jesus's being treated as if they were two people, and that is Insane, there is no debate about the truth written in the Bible, even with the Insertion of Christ, there is no way you can convince me that Jesus was a Common Name, and the fact that Christ is not actually a Real Name, it is a Title for a Deity that by definition does not Physically Exist, so what was Jesus Christ last Name? Bar/Abbas, the Man that was actually Crucified on the Cross for fighting for the People against Money and Taxation.

# Ball Lightning

## Ball Lightning

Ball Lightning is a very rare natural phenomenon caused by Lightning, it is also one of the least known because of how rare it is, but it is documented, and I do not need to change the Definition, but only to point out that this is not Matter Lightning. The shortest explanation is that Lightning can become so intense that the bands of Light separate by frequency, which is modulated by the Trinary Energy, this forces the Darkness to the outside, which would give it the appearance to have a Dark glow to it, but it is a very intense Ball of Light, and is not connected to Lightning directly, nor has it ever according to Nikola Tesla who said he had seen one in Colorado while doing experiments with Lightning, and many more reports, say that the Ball of Light had a Dark Glow, and a very intense densely packed core, which seems to float down from the Sky, then travel erratically till it would hit something that would ground it out, causing houses to burn down, trees to catch fire and so on, its size can vary from the size of a marble to the size of a large beach ball. I do believe that it can be created artificially with Lightning, but that would require a lot of advanced technology. In Trinary Science there is a Theory that Trinary Engines are born from Ball Lightning.

Ball Lightning has been recorded with Full Spectrum video recorders in Earth's orbit, they are referred to as UFO's, and proof that they are Intelligent, and are just baby Trinary Engines that fly around the Planet all the time. Nikola Tesla thought that it was rare that Ball Lightning came down to Earth, since it has its own Gravity, so he thought that they must fly around the Planet, and thought that most UFO sightings were just Ball Lightning encounters. Newton wrote about seeing Ball Lightning, and accounts of others, and thought another about it to write it down, although he did not offer any Theories, he did say they seem to dissipate into any object they touch, Newton also made the same observation, and noted that they can burn down houses, Tesla once burned down a barn trying to make Ball Lightning.

I define Ball Lightning as being a Ball of White Noise, this does not mean its White, since White Light has all the Colors of the Rainbow in it, Ball Lightning comes in many Colors, I talked about seeing a Pink one as a child as it floated into a room, where my family was watching TV, and we all saw it at the same time, and changed colors a few times, to a Green, and may even Blue, many colors have been Reported throughout time. All reports of close encounters left most people thinking they were alive, you can do research into this and find more evidence by firsthand reports, that indicate they have Intelligence, avoiding obstacles, moving at high speeds, making right angle turns, and they even depict them as looking like Spacecraft, Chariots of the Gods has more proof for Ball Lightning than anything else, and in fact the Bible talks about Ball Lightning, they call them Angels: according to Newton... Angels have appeared over Jesus's, and others heads; some being those that were born on 25 December, like Horus, Mithras, Krishna, Dionysus and Other Pagan Gods, clearly seen as a Halo, and known as the Lamb of God, because Sheeple believed it was the sign of a Deity, and it was described as Crown or Corona, with Light Rays; Newton said this Represented people who were Touched, or Touched Ball Lightning, even Thor was based on this Knowledge of Lightning Balls, that shot out of his Staff of Power or Hammer, but Newton said the Hammer was a Crystal Ball, inside was Ball Lightning, it was used to provide Gravity, and if welded like a Hammer, its Energy would be released, if the Crystal Ball Shattered, causing Thunder, and Releasing the Lightning inside it... I do not think this was a Weapon; this is Science at its best, almost lost Science because of what Newton said about Christ; so is it ironic that the Symbol of Jesus Christ is Ball Lightning, and it is also Thor's Hammer, how we weave Myth into Legend, when common sense and Science explains much of what is written in the Bible, and it is why Newton wrote more about the Bible than Science, because it is a Fact that Ball Lightning is symbol of Christ, and God is All Light without Darkness, so God is the Ball Lightning, and Tesla said the Light was Everything, so Ball Lightning is the Origin of Everything, its Proof that Trinary Engines are alive, so all the Heavenly bodies are alive, because Ball Lightning is just Baby Trinary Engines, so now we know how our Moon was born, our Planet gave birth to it, so Ball Lightning or Baby Trinary Engine, what better describes Gods work. Now if they turn out to be UFO's, that would explain everything; what will really rack your mind, is that we can use them to build Spacecraft, that is how our Planet was built, and it is the best Spaceship I know of.

## Buttnaca

Buttnaca is a Concept that you can get an Oxygen Bottle and a hose, stick the hose up your Ass, and fill the Bottle with Gas, that can then be used to fuel the World, and solve its Energy needs...

Butt the Buttnaca takes it to another Level of Anal Entertainment, that will blow more than your mind, it will blow your paints off with a ButtZooka...

## CopyRight

### CopyRight

Copyright is part of the Darkside Laws of Moses, it is used to Legally take what does not belong to you, which is words and spells that make up Concepts and Ideas, and all comes down to Money.

A Lawyer would never sell you words that he could not steal back, making all Legal Transactions are up to the next highest bidder, by defining words in ways that makes people liable for using them in a way that is a crime, is what all Laws where created to take away from People, and that is their Freedom to do anything, Laws do not give you Rights by making those that do not agree not Left, so its better to be Left then it is to be Right, so never use CopyRight when you can use CopyLeft, CopyRight is Evil, but you can live with a CopyLeft by.

---

## CopyLeft

### CopyLeft

CopyLeft is part of the Light, it means that this information is Free, which means Free of Money and all Laws.

Freedom is Free of Dumb that CopyRight creates just for Money, so CopyLeft means you can use it without the Need of Money, just give Credit for who Left the Copy, you should always share in the Wealth of this Planet and never Profit from it, so any Money that is created by using such a Free and Open Source of Content, can not ask for Money, instead they ask for Credit, and not a Credit Card.

CopyLeft does not mean you have any Rights to Print it for Money, or put it on sites that use Advertisement to generate Money, who every uses the Seal has implied Revenue of what is considered a Fair Share, this is no Contract for what is considered Fair, since there is no Contract, so be Fair and everyone will call it Fair.

## Dimensions

### Dimensions

Dimensions are described in terms of Physical size, with words like: Width, Height and Depth, but when we remove 1 of these dimensions, and we have 2 dimensions, in normal space this can be viewed as width or height, or any combination of width, height and depth, but in reality those labels have no meaning in dimensions less than 3, because if we have 2 dimensions, and we remove 1 more dimension, then we can only view it as having only 1 dimension, so labels like width, height or depth have no meaning, so if we remove 3 dimension we

have 0 dimensions, and space can not exist without dimensions, and now its clear that width, height and depth had no meaning.

A Dimension always starts at the center of mass of every Atom in the Universe, then descends from that point, so the 2<sup>nd</sup> dimension is inside the atom, and the 1<sup>st</sup> dimension is inside the 2<sup>nd</sup> dimension, and the 0 dimension is inside the 1<sup>st</sup> dimension.

Only Trinary Energy can exist in the 0, 1<sup>st</sup> and 2<sup>nd</sup> Dimensions, and each dimension has a specific type of Energy, the 0 Dimension is a Floating Ground, and all Energy Flows from it, the 1<sup>st</sup> dimension control signals that are sent to the 2<sup>nd</sup> dimension, where all changes are made in the 0 Dimension, the 3<sup>rd</sup> dimension contains these other dimensions, but they are only inside of Atom, which is confusing, but we are inside of an Atom we call the Universe, and the Earths core is actually an Atom, as well as the Sun and Galaxy, so Atom's contain other Atom's of various sizes, but to understand how we can be inside of an Atom, would require a point of view of God looking at us under a microscope, because it is all a point of view in dimensions above 3.

Space is defined as having 3 Dimensions, each are Single Dimensions, numbered 1, 2 and 3, the 3<sup>rd</sup> dimension is considered normal Space, it consists of 0, 1, 2 and 3 dimensions, the 0 Dimension has no Space.

## Energy

### Energy

Energy is defined as physical matter: that can be used to fuel or energize something in a way that it can be transformed from one form into another, like water can be transformed into Oxygen and Hydrogen, and when you burn them, it transforms back into water, so Energy can not be Created nor Destroyed so Energy is Eternal, it can only be transformed from one form into another, and there are all kinds of Energy, for example: Energy is Atom's, these Atom's have a Frequency and a wavelength, so they form Light, Electricity and Radiation, and there are many types of Energy: Chemical reactions, Kinetic, Potential, Radiant, Elastic, Thermal and the list goes on, but all Energy is based on Atom's, with the exception of Trinary Energy that Atom's are made of, so Atom's could not exist without this type of Energy called Trinary Energy, so its considered the same, since you can not have one without the other, but everything in the Universe is made of Atom's, and they are made of Neutrinos and Trinary Energy.

---

## Ewer

### Ewer

A Pitcher or Jug, otherwise known as a Water Bag, so it is a vulgar term for Ewe, because they would cut our a Sheep's Stomach and Colon, or even its womb, and make a Water Bad out of it, this is what the Shepard Herders would ware around their necks, to remind the Sheep what will happen to them if they do not behave like good little Sheep, in the middle of the Night, I think this behavior is insane, but as a Dog protecting the Sheep, the Wolves were not the only Predators out there, so the term comes from the view of the Dog, when the Dog has to protect yew from Ewer ways in the middle of the Night, witch is a reference to Darkside of behaviour, its Crystal Clear this is Witchcraft, because Yew allow Ewer ways to become known as Bestiality, that is this altered state of Reality where Humans believe its Natures ways to Mate with other species of Animals, such that Ewer ways are disgusting to people like Me.

# Galattice

## Galattice

The Galattice is where the Trinary Universe stores its Memories, in humans its considered the Brain, but in Trinary Science the Brain only Accesses the Galattice, which is just Energy that is located in the 2<sup>nd</sup> Dimension, and is stored in the Galaxies Energy Disk, the nature of this arrangement is that the Universe works similar to Brains in all Lifeforms, there are 3 sets of Brain Functions, the first is where Logic is Stored, the second is where Reasoning is Stored, and the third part is where Memory is stored, yet Brain Function alone does not explain thoughts or how they are stored or altered, since all Trinary Numbers starts at 0, we have the 0 Set of Brain Functions, so this is a No Brainier, this is where the Brain communicates with this Little Voice we all have in our head, we do not use it to think with, but more or less to talk to, as if we are expecting other voices to answer, and that is never good, trust me, I can play videos, watch memories, edit memories, and watch them over and over again, because of OCD, and that is how I figured out this place exist, and why few believe its Science, because if the Galattice exist, so does God, and Normal People do not want to be lain to again, first they are lain to about God being a Deity that does not Physically Exist, when the Bible was always very Clear about what God was: All Light without Darkness, and that is what the Galattice is made of, so this is that place where God Exist, and how God Exist, so as Proof God Exist: Light without Darkness is Energy, and that Energy flows through all Life, its recorded in our Brainwaves, and there is no other explanation for how we can Talk to ourself, or how we Dream, or have out of Body experiences.

The Word or Spell Galattice has Greek origins from the word Galaxy, combined with the German word Lattice, meaning the Structure with an upper and lower band, in this case Light and Dark, or 1 and -1, the 0 State is unseen, and sometimes dropped, because it is function is to allow Energy to flow.

Our Mind is actually located in the Galattice, our Brain only stores pointers to Memory in the Galattice, this explains how we can go out of Body, and explains where we go when we die, we actually never leave this place, and only have access to it in your Dreams and Memories, it may seem like you are the only one there at times, and it is because we all have our own Resonate Frequency, it is the Key to our SOUL, it is the same place you call your Mind, or anyone calls a Mind, yet Physically its just Energy that continually flows through us while we are alive, and that Energy Lives on in all Life, and why some People Remember Past Lives, and why that without it, God would not exist, and I would have no Memory of what I did today, I would just forge for food like most animals do, instead of try to understand the Universe I live in, so its only through this goal of having an Advanced Society, that has a firm understanding of the Universe, and accepting some concepts as Proof that God exist just like Newton, Franklin and Tesla said it did.

## Holly Ghost

### Holly Ghost

The Holly Ghost is an Ancient Celebration of the Holy Ghost using Holly: which is a genus of over 666 species of flowering plants in the family of Aquifoliaceae, which over 66 species have gone extinct since Newton's days, yet this practice still exist to this date.

Ilex is another term for Holly, Witches used Ilex to make elixirs, and this is where the use of these flowers came from, such that the usage of Holly Ghost instead of Holy Ghost, is to signify the usage of Holly to make a Witches Potions, noting that Holly comes from the Ground, and is therefore Grounded, and also a Ground that Mother Nature provided, note the Word Spelled Ground actually means to Ground Holly up into a Powder. While other times its usage is by mistake, Wizards use Spells, but have a hard time Spelling them the same way twice, but it can also be said that the letter L, has another meaning witch is Legal or a Lie, so they are Synonyms, by adding the extra L to Holy, signifies the Legal Lie that was inserted into the Bible by removing the extra L to

begin with, since the original way the word was Spell was Holly, it was like changing the Root of All Evil is Money, into the Love of Money is the Root of all Evil, witch was done when Christ was inserted to make Money less Evil.

## Matter Lightning

### Matter Lightning

Matter Lightning is a very well documented phenomena caused when Lightning or equivalent Lightning Generated Electricity Arc, hits a substance that it can ignite, and it will burn and appear to float in space, but will normally dissipate when the substance burns up. This substance is normally silica based, so power lines or the ground are good sources of material.

## Numerology

### Numerology

The reason why most of Yew are Stupid, is because of Mainstream and the way they Define Reality, for example this is how Mainstream defines Numerology:

Numerology is any belief in the divine or mystical relationship between numbers and events. It is also the study of the numerical value of the letters in words, names and ideas. It is often associated with the paranormal, alongside astrology and similar divinatory arts.

As it turns out: Mainstream defines God as a Deity, and the reason why, is that they are Satanic, as proof: Satanic means they only tale you half Truths, for example: God is both Physical and None Physical, so if you ask God what God is, God will tell you: IAM, now the Letters I, A, M are Bible Codes, so the letter **"I"** has to always refer to the First Person, and the letter **"A"** means to Append, or to Add, so it is a Math Symbol, and also a Bible Code, and the letter **"M"** always refers to Me, or Flesh, and in the Bible: IAM God: means: IAM Light without Darkness, and without Darkness means without Neutrino Particles, proving Mathematically that God Exist both as Physical and as None Physical Light, proving that both Exist, therefore its my hypothesis that God is Physical and None Physical, and only Satan would say that God is a Deity that does not Physically Exist, because in Reality and only in your Mind does God either Physically Exist or God does not Physically Exist, so think about this Logically: Deity means God does not Physically Exist, and Christ is based on God being a Deity that does not Physically Exist, much like Christ in History, so now a Pattern of Logic is revealed in Magic known as Witchcraft, I tale you one thing and tell you another: tale means to write a Story, tell means to verbally speak those words, but is often used to mean the same thing, over time a Tale became known as a Lie, as in to Tale the Truth, but in Reality its use is: a fictitious or true narrative or story, especially one that is imaginatively recounted, but in Math it is a number or total like: **"an exact Tale of the dead bodies"**, but if what they Tale you and what they Tell you are not the Same, it is a Half Truth, because only half of what they Tale or Tell you are the same, and the Bible was very Clear about Sinners, they will Live in Sin and Lie about it, so what is the Truth about God: either God Exist or God does not Physically Exist, pick one right now and decide for yourself the Truth? If you believe that God does not Physically Exist, Legally you are Insane, because the Bible states that God is All Light without Darkness, and Sir Isaac Newton's book about Light proved that God exist, and his Math proved what God is, and that is Light without Darkness, so the two agree with each other, but Religion does not, and that is because Satan is in charge of Religion, and the Bible Proves this, because only Satan tales you half Truths, and if God Exist, teaching you God does not Exist is a Lie, and by Definition if God does not Physically Exist, God does not Exist, and this is called Reverse Logic, and only Satan uses it, and why I do not care what yew believe, nor does the Trinary Universe, Know it or No its Not, and the Logic in this Statement is that only Satan would say No it Not, for example: by defining God as a Deity, you are teaching God does not

number 1 got to be known as the Ace, and another term for Ace is Wizard, because it was given more Power than all the Others, so as it turns out, Cards are in the Bible's Code.

There are many more rules in Numerology, but this is not a book about Numerology, this is only how I use the Math to decipher the Bible Codes, and in Trinary Math God is the number 0, and the numbers  $\pm 1$  are its State changes, so it is absolute value of  $\pm 1$  is 1, so take 1 and add God to it, and get 10, that is Numerology, but the Science behind, is that all Atom's have 3 Force Field Rings of Power, the Electron and Trinary Particle, that has an Atomic Number of 0, and currently not listed in the Official Periodic Table of Elements, but Theoretical Particles can be found there, but neither of these Particles have Valences, but all other Atom's do, and a Valence is a Key or Receptor, that other Atom's bind to, and it is how Electrons orbit Atom's, it orbits around there Valence or Force Field Rings, and there are always 3 of them, each Ring is  $10^x$ :

$$10^1 = 10$$

$$10^2 = 100$$

$$10^3 = 1,000$$

$$1/(10^1) = 0.10$$

$$1/(10^2) = 0.010$$

$$1/(10^3) = 0.0010$$

and in Numerology they are known as Ring Powers:

R | Powers of  $10^R$

1 | 0.10

2 | 0.010

3 | 0.0010

As such: these are Powers of 10, now to say God is 0 in Trinary Math and God is Powers of 10 in Trinary Ring Math, should be easy to understand, and any numbers need a Base, and this is why in Numerology its base the Power of 10... Powers of 10 is also why every thing is in Inches, Feet, Yards, and Miles. The Rule of Separation in Powers of God (10): such that: 666 ~ 666.0: 66.6, 6.66, 0.666: these are Patterns, but is this the Mark of the Beast?

Numerology is about Harmony of Numbers, and the Greek philosopher and mathematician Pythagoras of Samos (c. 580- c. 500 BCE): is credited with discovering that the Harmonic Intervals correspond to unique whole number proportions, by Dividing the vibrating string of a musical instrument in the ratio 1:2 produces the interval we call an octave, and that by Dividing a string into a 3:2 ratio creates the interval we call the fifth, producing the difference between do and sol, and a fourth is the difference between do and fa, represents a 4:3 division of a string, and according to Wikipedia: today, we recognize that these musical intervals are produced by, in the case of an octave, doubling the rate of vibration of a string (from 200 vibrations per second to 400), as such: a fifth is the difference between do and sol: would be produced by two strings vibrating in the ratio of 200 to 300. Kepler rigorously investigated auditory space through experimentation. The followers of Pythagoras limited their musical system to the 3 intervals mentioned above. Kepler sought to determine all of the possible harmonic ratios for sound, and to inquire as to their causes in the domain of geometry and mathematics. The Term Binomial means an algebraic expression of the sum or the difference of two terms, so the term applies to Binomial Sounds, and in Trinary Science, this is how this knowledge is used: So in Numerology the Mark of the Beast is measure by the Frequency it resonates at, and to understand this concept, you must understand Music, because Kepler based his Math on the Harmony of the World... I borrowed some music concepts that related to what Kepler knew... In music from Western culture, a sixth is a musical interval encompassing six note letter names or staff positions (see Interval number for more details), and the major sixth is one of two commonly occurring sixths. It is qualified as major because it is the larger of the two. The major sixth spans nine semitones. Typically, the triad is a major triad and the additional sixth interval is major (major sixth chord). For example, a major sixth chord built on C (denoted by  $C^6$ , or  $CM^6$ ) consists of the notes C, E, G, and the added major sixth: A. The cent is a logarithmic unit of measure used for musical intervals. Twelve-tone equal temperament divides the octave into 12 semitones of 100 cents each. Typically, cents are used to express small intervals, or to compare the sizes of comparable intervals in different tuning systems, and in fact the interval of one cent is too small to be heard between successive notes. In music theory, a perfect fifth is the musical interval corresponding to a pair of pitches with a

frequency ratio of 3:2, or very nearly so. In classical music from Western culture, a fifth is the interval from the first to the last of five consecutive notes in a diatonic scale. As the frequency of a pitch doubles in value, the musical relationship remains that of an octave. Thus, for any given frequency: rising octaves can be expressed by the formula:

$f * 2^x$ , where x is a whole number.

So for a frequency of 27.5 (the lowest A on the piano):

An octave higher is  $27.5 * 2^1 = A 55$ .

An octave above that is  $27.5 * 2^2$  (two squared) or  $27.5 * 4 = A 110$ .

An octave above that is  $27.5 * 2^3$  (two cubed) or  $27.5 * 8 = 220$ ,

and the octave above that is  $27.5 * 2^4$  or  $27.5 * 16 = 440$ ,

which is the standard tuning note for the orchestra. Thus, octaves rise exponentially as 27.5, 55, 110, 220, 440, 880, 1760 and 3520, the fundamental frequency of the highest A on the piano. Every octave is twice the frequency of the previous octave. Numerology is about this Relationship, if you take 0 as a special case, each of the 12 Zodiacs are accounted for, and you can use any of these values to make Sense of Cents, then wonder why  $41.666 * 2^4 = 666.66$ , and why the number 42 is the Universes answer to everything, and why the Bible stops at chapter 44.666, because: The number 42 is, in The Hitchhiker's Guide to the Galaxy by Douglas Adams, the "Answer to the Ultimate Question of Life, the Universe, and Everything", calculated by an enormous supercomputer named Deep Thought over a period of 7.5 million years. Unfortunately, no one knows what the question is. So what does the number mean in the Bible if I do an internet search: Forty-two is a number with a direct connection to the coming Antichrist: his Evil efforts will last 42 months in the end time, and thus, 42 is firmly associated with him. Then the angel gave me a measuring rod like a staff, saying: **"Arise and measure the temple of God, and the altar ... and they shall trample upon the holy city for forty-two months"** (Revelation 11:1 - 2) Revelation 13 states that the end time Beast Power will be so powerful that NO ONE will be able to make war with him. He will speak great boastful things and be given the authority to do so for 42 months (Revelation 13:4 - 5). Forty-two is made up of 6 and 7, showing a link between mankind and God's spirit and a link between the Antichrist and Jesus Christ. Appearances of the number forty-two: The phrase **"little children"** appears forty-two times in the Old Testament. The tribe of Levi was given 48 cities as part of their inheritance in the land of milk and honey. Six of these cities were to be designated as special **"cities of refuge"** (Numbers 6 - 7) leaving forty-two other cities. King Ahaziah of Judah began his reign at 42 years old but was only on the throne one year (2Chronicles 22:2). The children of Israel had 42 sojournings or wandering in the desert until they finally were given rest (Numbers 33:1 - 50). When we substitute numerics for letters in Nimrod's name we find forty-two playing a role. Nimrod's name equates to 294, which is  $42 * 7$ . Forty-two is often found as a factor in Anti-Christian names. Elisha and 42: A group of young men (roughly 30 - 40 in age) began to make fun of the prophet Elisha after his friend and mention Elijah was taken away from him in a fiery chariot. They shouted **"Get out of here, you bald guy!"** to Elisha as he passed them by. The prophet did not waste any time letting the young men know that what they were doing was unacceptable to God. He turned, stared at them and cursed them in God's name. Then two large female bears came out of the woods and tore to PIECES forty-two of the men (2Kings 2:24)! Additional info on the Biblical Meaning of 42: In the genealogical table of Jesus Christ's physical lineage in the book of Matthew, the Greek word gennao is used 42 times. Its correct translation is the word **"begat"** because the lineage is through males who **"begat"** a son. So what does the number 42 mean in Numerology? 42 in Hex is 66. See **Table Terms Music Numerology**

Why does the Bible say the Number 666 is the Mark of the Beast? If you look at the Galactic Track Table from the link above, you might understand, so the question is how did I get this Magic Number -333 Trinary Engines, and the answer is String Facts, do not confuse this with String Theory, if I where to reverse engineer how I made this Table, its clear I had to know how many Strings I needed, and every Trinary Engine is a String, it has a specif Frequency, and ours has a range of 3.33 to 6.66, how can I prove this is simple, try every known number between 1 and a Trillion, now you get it, these are the only numbers that work, Newton gave up after 13 by the way, he believed that was the Maximum based on 3 PI. So how do I prove it, if you look at the math for the table in makeappendix.g.sh,

$orbitDist = (bc <<< \backslash scale = 13; ((\{galaxyRad\} * \{trackNumber\}) * 2) * \{pi\} \backslash);$

galaxyRad=241828072282107.5071453596951;

is based on the size of the Galaxies Light in parsecs, so it is what most Scientist would expect to be used, so based on those numbers:

1,011,954,093,357,316,200 miles, and it takes 88,330,000,000 days, converted into Light Years would be what most Scientist would use, so take what they would use, and this is that number in days, as proof:

$1,011,954,093,357,316,200 * 88,330,000,000 = 477,354.850$  miles an hour, and currently how fast our Sun is orbiting the Galaxy, looking at the table I have a Maximum speed of 666,666 and Minimum of 333,333 Mph,  $f * 2^x$ , such that:

$$666/2 * (2^4) = 10,656$$

$$10,656 / 16 = 666$$

and you will notice that Track Frequency is based on minSpeed,

trackFreq=\$(bc <<< `scale=16;.0000000000001 \* \${minSpeed#-}`); and this is based on Numerology, and that means it is all based on Empirical Evidence, so what is the Magic behind this number 666...

In Trinary Astronomy, we can use the angle of Light to measure a Parsec in distance, so how do these measurement systems we use work: First assign a to our Magic number of 666, such that:

$666/2 = 333$ , since we are talking about a radius, so we have to divide by 2, such that:

$$a = 666/2 * (x ((1/12) * (1/5280)))$$

such that:

$$5280 * 12 = 63,360 \text{ inches in a Mile,}$$

$$333 * (63,360 * ((1/12)*(1/5280))) = 1,$$

$$\text{and } 1 * 0.007299270073 = 0.007299270073,$$

that adds down to 1, so dividing that by 3 gives us 0.00243309002433, note it has a pattern of: 2433, add it down:  $6 + 3 + 3 \sim = 6 + 6 = 12 \sim = 3$ , because this is 1 unit of distance, so 3 equals 3 cycle of 3 Phases, based on 63,360 inches, add it down:  $9 + 9 = 18 \sim = 9$ , so in terms of speed: the 369 pattern is involved here, and it is only a Ratio of the distance you cover, so in terms of Speed, the Electrons speed is relative to its size, so in terms of Miles per hour, we have to look at how much distance can be covered in a period of time, for example: this plots the Force Field Rings around the Atom, for the Sun, it gave us a ring that had our speed on it, so what this speed is calculating, is where is Life in this Range of things, so the answer is this ring is located around this atom, and it is orbital speed for this ring is  $1.536041682e-16$  mph, and that is something you have to wrap your mind around, Trinary Math is based on where Life exist, based on Maximum and Minimum values, so think about the Sun, its Diameter is:

$864575.9 \text{ Miles} * (1/137) = 6310.77299011 / 3 = 2103$  years Maximum in 1 Iteration, that means the Sun must orbit the Galaxy in Iterations of 2103 years, now using the Error Rate we know it is 2012 year, now think about how far it can travel in 2012 years, that is 1,348,031,952 miles, so this is the distance, now we must average that distance since it has a high, low and average distance in a Helix shape orbit, and that is what we do when we multiple 2012 by 333 equals 669,996 with an Error Rate its 666,666 miles an hour, and that is the maximum speed of the Sun as it is Orbiting the Galaxy... so is 666 the Mark of the Beast?

Numerology is very Old Math, it was so old that Kepler had no idea how old it was, it was old when the Bible was written, and as it turns out, that was not even during this Track of time, so this is not Math that I created, I create Trinary Math that uses Numerology, and this Table proves the Mark of the Beast:

**Table 36 Factors of 666 in Numerology**

, now from this Table we know for a fact that 666 is the key Frequency for Track 666, but how does this whole thing work as Trinary Science is to be proven in the Chapter Trinary Mathematics.

Semi tones	Ration	Cents	Pythagorean	Meantone	Equal temperament	Class	Interval	Frequency in Hz * 2 <sup>4</sup> or 16

**Table Terms Music Numerology**

Every Iteration the Zodiac takes on this Property, and adds it to what you have, so for example the 12th Zodiac is Pisces, 32 + 6.66 = 38.66 Hz, in turn this adds to the Precession needed to counter act the forces, required to complete this Iteration, keep in mind there are over 14 Thousand Iterations per Galactic Crossing, and each are required to bring Harmony to the World according to Kepler, so Newton understood some of this, but enough to figure out the Math, Tesla understood much more, but could not get the funding to do experiments to prove any of this, and I just found new Trinary Math that uses new Methods to Calculate what Newton had to do by Hand, and Newton's math works just fine, this just proves why, and gives you a much simpler Math to do it. We just moved into the 11th Zodiac Sign of Aquarius, its Frequency is 30 Hz - 6.666 = 36.66 Hz, and this is the Frequency of a Polarity Reversal, to Calculate a Polarity Shift use this Formula: Iteration in years \* (Frequency \* .00001 (0-3 - 4 Decimal points) ) \* 2012 = Maximum Years between Magnetic Polarity Reversals, (2012 \* (30000030 \* .00001)) = 300.00030 how many times it reverses in a half cycle, 300.00030 \* 2012 = 603,600.60360 every years, do not confuse this with this Formula for speed, Iteration \* Trinary Engines = Speed, 2012 (Iteration) \* 333 = 669,996 mph.

**Table 36 Factors of 10,656 in Numerology**

A Rule in Numerology allows me to use this fact: 42 in Hex is 66, and  $6 * 7 = 42$ , and  $4 + 2 = 6$ , and  $6 + 7 = 13$  and  $1 + 3 = 4$ , so using 4 as the x in this formula for Music Numerology:  $f * 2^x$ , such that  $2^4 = 16$ , so we can confirm all these numbers in Numerology, and  $1 + 6 = 7$ , and  $3 + 4 = 7$ , and another way of looking at this is asking what number 4 is, and that is the intervals of the 3 Power Rings: 0-3: this equals 4, I get:  $666 * (2^4) = 10,656$ , and finding all the factors of 10,656, gives me the Table above, and if I look the number 16 on this chart, you will find  $10,656 \div 16 = 666$ , so 666 is the Mark of this Beast Mathematically.

## Pareidolia Syndrome

### Pareidolia Syndrome

Pareidolia is a psychological phenomenon involving a stimulus from an image or a sound which is perceived as significant, this type of Pattern Recognition is broken down into 2 main parts, the Pattern itself, and the Significance. Pareidolia Syndrome is when a Person with this condition tends to view the world this way to begin with, they perceive objects as patterns in their brain without even thinking about it, because it is the normal way for them to think, because they think in terms of Images and not words, so they assign meanings to each object like human, dog, or any other object they encounter during the day, and assign different meaning to each object even though some of them are in the same category like dogs, I have 2 of them, and they are very different, and just like that they tend to assign meaning to every pattern they see, so things like Lightning patterns, Sun Spots, or Clouds, take on names and shapes and have a history as old as the Universe, as if they are telling you a story.

I know about this condition firsthand, since I was born thinking like this, and although its rare, its more common with Autistic people, whereas Neurotypicals seem to actually have a hard time seeing patterns the Pareidolias see, even after we play connect the dots, but then to go along with the story that comes from attachments to the objects, the imagination takes over, and I can sit watching empty space for hours without even blinking, which is why this behavior is more noted in people like me who have an Obsessive Compulsive Disorder or OCD. Other traits are Photographic Memories, but now that I have other health issues, this issues has become a problem, as it does with most that suffer from it, because it starts to run their life, it is not like hearing voices telling you to do things, it is more of a ritual, because they can not stop doing it, so people that have Pareidolia Syndrome, can not stop seeing patterns in things.

### Quarks

A Quark is an elementary particle and a fundamental constituent of matter. Quarks combine to form composite particles called hadrons, the most stable of which are protons and neutrons, the components of atomic nuclei.

## Satanic

### Satanic

Satanic means backwards Logic, as such: it also refers to backwards Morals. In the Bible Money is defined as being the Root of All Evil, the Love of Money means that the Person who Loves Money is Evil, as such: People who think Money is not Evil are Satanic, whereas People who believe Money is Evil are not Satanic. Live is a backward Spell for Evil, so anything Optional you can not Live without is Evil, for Example: Food and Water are not Optional, Money is, so if you can not get Food and Water without the use of Money, then the Money is Evil, because you can not Live without it, therefore use it to Kill people by Starvation, or you can Pay someone to Kill someone for Money, yet the Military and Police do it all the time, and they also work for the Banks that Print the Money and Not Congress, which makes them guilty of Treason against the Constitution, proving they are Satanic, and work for Satan, yet I am Retired Military, so I am also Satanic and a Sinner for using Money, and I wrote this book knowing that, so in order to Live with myself, I have to acknowledge the World I live in, because it is totally Satanic, and it is because of Religion, they believe that God and Christ are a Deity, meaning they did not Physically Exist, also defined as Insanity, and why most people do not understand they are Satanic for using Money, or Believing that God does not Exist, and that Christ did, thus, Denying that Bar/Abbas was the true Savior, but those that worked for Money knew he was a Threat, so they Denied they knew Bar/Abbas, and instead knew Christ, thus, setting Bar/Abbas Free, by Killing Christ, which as it turns out is the same person according to both History and Sir Isaac Newton.

## Sheeple

### Sheeple

Sheeple is a term that is used to describe People who believe in things that are not Real, or that do not Physically Exist in the Universe, or believe that Theories are Facts, because by definition, those have not been Proven to be the Truth, if it were it would be known as a Fact, but a Sheeple is not a Human, it is a Sheep with a Monkey head and that is all it is, they are not real People, not even Real Sheep for that matter, and it is because I was about 6 years old the first time I thought about it, my Father said People are like Sheep, they only know that they Heard in the Herd, and my Cousin Isaac Newton was the first person I know that actually coined the Word, and it was in Reference to if People had the Lord as their Shepard, because that implies they are Sheep, so the Term Sheeple was something that was handed down from generations, Masonic Sheep Jokes about Darwin's Evolution, but as I grew Older this meaning took on a Darker Side.

The Word Real means it physically Exist in Reality, this term will lead to many arguments, because the 0 Dimension does not Physically Exist as Space, its void or null space, nor does the number 0 in the Math  $1 + (-1) = 0$ , but we know from Empirical Evidence that every Atom in the Universe goes through 3 State Changes, and in one of those States it disappears, so a third of the time the Atom does not exist in space, yet its Empirical Evidence that proves it still Exists, just not visually, because we can only see 3 Dimensional Space, so some will argue that is how God works, and I agree, but a third of the time Atom's do exist to some degree, only State 1 is physical, so God must also physically exist, because that is the way God must work, the Light without Darkness and the Darkness without Light bound together, and also known as Matter and Antimatter, so Sheeple do not believe this, because they do not believe God Physically Exist, and they believe that Christ does, knowing that Christ is just a Deity, and a Deity does not Physically Exist, so its clear that when talking about Jesus Bar Abbas, that if Christ did not Exist, only Bar/Abbas would, and he fought for Freedom, because of the Roman Empires use of Money and Taxation, and Sheeple Deny this to this Day, even though that is what all Bibles state is a Fact, and Sir Isaac Newton wrote about at length.

The difference between Sheeple and Wizards, is that Sheeple believe that God never physically existed, so God does not explain Atom's, whereas Wizards believe that God exist, so God explains Atom's, and Sheeple believe that they can see the Light, when Empirical Evidence proves that humans can only see the Darkness, which is the Rainbow of Colors in the White Light of the Sun, whereas God is all Light without Darkness, so there are 3 types of Light: Light without Darkness, and Darkness without Light, and the Light that controls them, it is a massless Light, also known as White Noise in White Light or Trinary Energy, but the logic of Light without Light confuses Sheeple, so they call the Darkness the Light and believe that is what they see, so Sheeple define words and how to spell them to mean things they can understand, so they read into words instead of just reading them. We can use infrared cameras to film in total Darkness, so does Darkness mean that there is no Light in it? That is a question only a Wizard could answer, because it is only in this Darkness can we see that the Light still exist, even though we cannot visually see it, so this is the Light of God, Wizards know that the Light has many Frequencies and Wavelengths in the full Spectrum of Light, and humans can only see a limited range of spectra of Light, but that will not stop the Sheeple from arguing about what the Light of God is, because they will never admit that God is Electricity, because Light is Electricity at a different Frequency, because Sheeple only use Emotions and Theories to explain Reality, and Wizards only use Empirical Evidence, and it is just a fact that to Sheeple, God and Christ is a Deity, proving they actually do not believe they Physically Exist, and they believe that the Light is Good and the Darkness is Evil, proving just how Stupid Sheeple are when it comes to understanding the Light without Darkness, because there Science is based on Theories about General Relativity, knowing that Einstein said that had Paradoxes without God, and Religious people do not actually believe God Physically Exist, as proof, if their Science is based on Mainstream Theory, or the Godless Dynamic Universe, they do believe God exist anymore than those do not Believe in God at all, since believing in Something that does not Physically Exist makes you Insane, Sheeple are Insane.

It should be clear that Sheeple do not believe in Reality, so they are insane by definition, they do not believe in the Light of God Newton described, as the Force of Gravity in all his Equations, and they will never admit to the Truth of Science because they will never see the Light of God, but to be Clear, once they do, they are no longer Sheeple, they are People who understand what the Light of God is, but Wizards take it to a whole new level, and just like to make Fun of how Stupid Sheeple are for not understanding God, according to Newton or Tesla, they had over 333 years to study Physics, and Stupid Theories is the best they can do, proving they are too Stupid to Survive the Ice Age coming in 2060, and will go extinct, in what the Bible said was the End of Civilization.

## Stars

### There are 3 types of Stars:

Light Star: Light without Darkness

Dark Star: Darkness without Light

Guiding-Light Star: has both Light and Darkness

The Light Star is a Trinary Engine used in Planets and Moons, it is created with Light Energy.

The Dark Star is a Trinary Engine used by the Galaxy to move Planets and Moons around its System, it is created with only the Dark Energy, although this energy is in the Visible Spectra of Light, it is not easy to see or detect, because it has no Electromagnet signature outside its orbit, this is because the Light Energy is what propagates the Electromagnetic Energy, this type of Trinary Engine receives Energy from the Guiding-Light Star, which controls its movement, it acts like an invisible Gravity well, and can pull planets like a tugboat pulls a ship on the ocean, our Sun orbits a Dark Star, and it is Companions orbit our Sun from outside the system of planets in its orbit.

The Guiding-Light Star is a Trinary Engine used as Galaxies and Suns, it has both Light and Dark Energy. The Light energy is in the invisible spectra of Light, and the Dark Energy is in the visible spectra of Light, and it is all we can see with our naked eye, this is the Rainbow of Colors in the White Light of the Sun.

If you understand these concepts then you are not a Sheeple, but if you pay or eat TaxUS, then you are still a Yew.

## Star Date

### Star Date

A Star Date refers to the alignment of a Stars position, the Great Pyramids have a built in features that aid in the detection of the alignment of a Star called Sirius, which has been known to always follow our own Suns Orbit around the Galaxy, as if the two stars where somehow connected as a Binary System with a Binary Star, this alignment normally took place on 25 December under the Julian Calendar, but the Gregorian Calendar changed that date on the Calendar to 14 January, so they could align Easter with the spring equinox, and so that Christmas would not be in the Dead of Winter like my Birthday is, since it falls on Saturn 14 January 1961.

Sir Isaac Newton said that a Comet would come out of the region of the Star of Bethlehem, which has a 333-year cycle, and we last crossed the path with this comet on 14 January 2014, the same Star Date that Sirius aligned with the Great Pyramid.

Sir Isaac Newton was born on 25 December 1642, this event is a Star Date, but during his lifetime the world was converting from the Julian Calendar to the Gregorian Calendar, and his birthday was changed to 4 January 1643 and then they removed 10 days from the calendar making the Star Date on 14 January 1643, after you add those days back to the Calendar, this logic may sound odd, but according to Newton, if you take into account all the Changes in Time, that the Gregorian Calendar will bring, it is hard to compare the Julian Dates to the Gregorian, due to changes that take place each year in each of the Calendars, so Sir Isaac Newton recalculated the date according to a Comet that we would pass through its Tail, just missing being hit by this Comet, but next time it comes around, it will hit the Planet, so to prove that Newton was right about that Star Date, Comet Ison, or Son of I, confirmed it, but others will argue this with no Evidence... Using online Julian Calendars that do not take real lifetime changes to the Calendar, according to it, 25 December would soon be in Summer, note that in 2017, its on the 7 January, and in 2917 it will be on the 14 January, in real life this would not happen, you would have to use a Star like Sirius (Serious) to Calculate it, but Stupid People that wanted the Gregorian Calendar would Lie about anything, because that is how Newton calculated the date, he did not use the Calendars to do so. Also, note that by Adding 10 Days to 4 January, proves its on 14 January all the time, those 10 days did not disappear, even when Newton was alive, so this did not sit well with him, which is why he went to such effort to prove it, such that 25 December 2013 on the Julian Calendar is the same as 14 January 2014 on the Gregorian Calendar. Note that Newton said this was to change the date that Jesus was born, to make those celebrating it Satanic, because it did change its date, but not its Star Date, and keep in mind that time was adjusted under the Julian Calendar to keep it the same every year, so just like we adjust our Clocks, so did they back then, so keep in mind how this changed time, instead of this Star Date being on his birthday, it now falls on mine. Keep in mind that Newton was powerless to prevent the Gregorian Calendar from taking over, but those that still follow Newton's ways, still use the Julian Calendar, the Military does, thus, so do I. They say a Picture is worth a thousand words:

outside the Cluster, so its Energy is being seen like a Movie, the Light without Darkness is what we refer to as background Radiation, when it hit is the force field of the Trinary Cluster, it Lights up like a Video Monitor, same principle in fact, it is just an Electromagnetic Marker that is painted by the Universes Electromagnetic Force Field.

Hubble's observations of distant Galaxies and Redshift, has made it possible for me to see the pattern, there are multiple Galaxies that form Clusters that all have one thing in common from long distances, which can be trillions of trillions of Light years away, and that is that all these Clusters appear to be connected by the boundaries of their Light, as if that is what is binding them together, so this explains why the Universe appears to be expanding, because the Clusters that are farther away seem to be moving faster away from us, and after half a century later I can only conclude that: if they were moving faster than the speed of Light they would be gone by now, even at the speed of Light they would be gone, but they are not, we can still see them, so they are not expanding, and that is based on Evidence, its just the way Trinary Clusters look like at far enough distances, because we are not seeing the direct Light from the Galaxies in that Cluster, we are only seeing the Light from the Trinary Cluster itself, because the Light inside of it, only travels in Ellipses, so it can never leave that space, yet we can still perceive its Light, when in Reality those systems may not even exist anymore, they could have gone Supernova a long time ago, while others are new born systems, much younger than our own, so their Light has not even made it here yet, so the Trinary Cluster is just a concept of a Light Sphere, this allows Light to appear to exist outside its Clusters boundaries, its like a projector screen, because it is a force field that acts like an Electronic Lens.

## Trinary Energy

### Trinary Energy

Trinary Energy is physically viewed as "**White Noise**", as a Joke it's been described as "**God's Particle**", and although I must admit it is not possible to prove Dimensions exist, I can prove that the 3 States of Trinary Energy can clearly be seen in, can be viewed as a Light, Dark and Empty State, where Light is the Brightest state, when it changes to Dark, it becomes less bright and moves to one side or the other, then when its Invisible or Empty or Null, it has to go somewhere, and the only explanation is the 0 Dimension, where space does not exist, because the Dimensions of Space do not exist, so Light is given a Description of Matter, because we normally view it as matter, because we can interact with it, and if we graph it on paper, we would put it just above the X axis and give it a value of 1, and Dark would be described as Antimatter, because it will always do the opposite of what the Light State is doing, and we can not interact with it, so we graph it under the X axis and give it a value of -1, and when it is Invisible we can describe this as Empty or Null space, and can graph it on the X axis and give it a value of 0, and we can note that in the 0 Dimension, there is not Width, Height, or Depth, so there are no Dimensions of Space, and why Atom's are invisible during this State Change.

Trinary Energy is a Massless White Noise, that binds Neutrinos to form Atom's, and Sir Isaac Newton called this Light without Darkness, and the Bible called that God.

## Trinary Engine

### Trinary Engine

Trinary is defined as 3 State Logic: 1, -1 and 0, and an Engine is defined as the driving force of an object, in this case it is the core of every Galaxy, Sun, Planet and Moon in the Universe. The Trinary Engine is created by Trinary Energy, its based on Trinary Science, its created by Lightning, but is not Lightning, its just the Light without Darkness the Bible said was God, so its Light Energy from the Lightning, and its State changes are only

1 or  $\bar{1}$  inside of an Atom created by a Neutrino type material called Tritanium, which is the stuff Supernova's and split atoms are made of, and that very large Atom surrounds the Null Space around the State changes, so the Null Space is a Trinary Force Field, not to be confused with the Magnetosphere that it creates around the Earth since it is the Core of the Earth.

The Trinary Engine concept came from my Dreams, I give credit to no one but God, but the Definition comes from the Bible, Jesus said that God was All Light without Darkness, so that meant that it is not Full Spectrum Light, but a specific spectrum of Light, and Light is not a Metaphor for a Deity or Spirit, nor is it Good, Bad or Evil as Religion would have you believe, Sir Isaac Newton proved that, so how is it that the Sun puts out Light with Darkness in it, yet God does not have any Darkness, and a Light went off in my Mind one Day as I was thinking about my Dreams, at the time I was 13, so it was around 1974, me and my little sister were almost hit by Lightning, which hit a power line Transformer instead, thinking back on that event, I took all the facts I knew about God and wrote them as a problem to solve, so it went like this:  $1 + (\bar{1}) = 0$  is the State Changes of the Light, so if God is all Light, then God must be the State Changes in the Light, and not the Light as we define White Light, or Full-Spectrum, meaning Light with Darkness, which is the Rainbow of colors in the White Light, but its more than just the "**White Noise**", this is Pure Energy, so its Lightning, it has Electricity and Light in it, and this Lightning has more Mass, Nikola Tesla proved that Real Lightning has more Mass then Electric Generated Lightning, so if Lightning could be Magnetically contained in a Sphere by the Electromagnet Pulse or EMP, that Lightning has been known to generate, it could open enough Ground Mass to terminate the Lightning without going to Earths Ground, thus, the Lightning with the most Mass would gravitate to the center of the mass of this event, and cause Ball Lightning, and if that can be held in place long enough for it to be coated with Tritanium, then it will be encased like an Atom, and behave like one also, in fact it would become an Atom, because that is how they are Created.

When I was in the Air Force, my main focus of study was in Electronics, Math and Science, but on the side, my only problem was figuring out how to build a Trinary Engine, although I never did, but I did figure out that it can be done, in fact I figured out how to make Atom's, then it occurred to me that if I did so on this Planet, that would not be a good thing, if an Atom did not fully form, it would explode like an Atomic Bomb, and even if I succeeded it could very easily destroy the Planet, not an Atomic size Atom, so that would be cool technology for a 3D printer, besides the fact that if the printer head jammed you blow up much more than just the printer, but one the size of a golf ball could punch a hole in our Trinary Engine, so I gave up on my research, it became more of I should not do this on a Planet I live on Experiment, then it came to me in 2013 that I could create Ball Lightning and create a magnetic field to hold it in place, and I could produce Artificial Gravity with it, but that is a very dangerous device also, but it is not a Trinary Engine in the true sense of the Spell, because it does not have an Atomic Shell, or Neutrino material called Tritanium, but you would have to periodically collapse the field to prevent the Tritanium from forming an Atom, so not only do I know how atoms work, I know how to make them, but still not on Earth, this needs to be done outside of the Earths Gravity.

My definition of a Trinary Engine is the same as my definition of an Atom, inside every Atom is this same energy I described above, its just the size that has changed, so if I ever use the Spell Trinary Atom, you know its just an Atomic size Trinary Engine, so everything I say about a Trinary Engine is true for an Atom, or Trinary Atom's, since they mean the same thing in Trinary Science, so they will orbit each other in the same manner, the Moon will orbit the Earth like an Electron orbits an Atom, the Earth will orbit the Sun like an Electron that has an Electron orbiting it, and the Sun orbits around a Dark Star, the same way, only there are more Electrons orbiting other Electrons, you see the pattern, so the Dark Star orbits around the Galaxy, and this is how atoms in space behave, one will orbit around the other, so the laws of physics does not change, everything we know about Atom's is true for the Trinary Engines, regardless of if the use is in a Moon, Planet, Sun or Galaxy, it is all about size, so size does matter, an Atom is a Trinary Atom, but a Trinary Engine is much larger.

## Trinary Light

Trinary Light includes Trinary Energy, all Spectra of Energy including all Frequencies and Wavelengths multiplied together equal the Speed of Light, and is Sun Light found in the Sun's White Light, so it includes the Light, and Dark Trinary Energy so Trinary Light has 3 State Changes. See Atom.

---

## Trinary Universe

### Trinary Universe

The Concept of the Trinary Universe is simple, Trinary is 3 State Logic change, the Universe is everything that exist, and in terms of Energy it is simply known as **"White Noise"**, in the Bible it is referred to as Light, and God is described as All Light without Darkness, and there can be No Light without the Darkness, and in the Bible **"White Noise"** is described as the Holy Ghost or Spirit of Mother, and Sir Isaac Newton said that God was the Force in all his Equations, so Trinary Energy is the Light, so its God, so the Bible is Science and Not Religion, so Trinary Science is based on all these Facts, and the Trinary Universe is how the Universe works in terms of Trinary Science, this Universe is based on the Newtonian Universe and is completely opposite of the Theories about the Dynamic Universe of Albert Einstein, but because of my idea about the Trinary Engine, I had to add the Spell of Trinary to describe this fully realized all-inclusive Concept of the Universe.

---

## Trinary Space

### Trinary Space

Trinary Space refers to the Physical Layers of Space as a whole, this space is made up of 3 Dimensions: 0, 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup>, sometimes I will say 4 Dimensions, that is because sometimes I count the 0 Dimension, but it is not a Dimension, it is Dimensionless, not to be confused with Dimensional Analysis. All of these Dimension exist at the same time, this means that the 0 Dimension is always there, it is all how Atom's travel through the Dimensions does this proves it exists, when you see an Atom in Trinary Space: for example under an Electron Microscope, you will see all 3 State changes: 1) Solid, -1) Semisolid and 0) Invisible, it will shift from one of these Dimensions to the other, because you can not see the 0 Dimension, it has no Space, but the Neutrinos are still there, you do not loss its Mass, even though the mass of an Electron is very low, as it is very small in size, its why it is the smallest thing and Electron Microscope can see clearly, you only see it when its shifting from one dimension into another, as such the 1 State and -1 State Change exist at the same time as the 0 Dimension, so it is not the Dimensions of space changing, its just the Neutrino Reversing its Polarity, just like the Sun or Earth, it too must Reverse Poles, so it is in these Dimensions of Trinary Space: meaning 3 Dimensions, Plus the 0 Dimension, this Real verses Not Real Number, when you add the 0 Dimension to 3 Dimensions, it equals 3, which is why you can see that Atom move and then disappear, but Atom's are only in the 3<sup>rd</sup> Dimension when they are not Shifting, which is 1/3 of the time, so when it appears to be Solid, that is only in State 1, in the 1<sup>st</sup> or 2<sup>nd</sup> Dimension, this is because when it changes from 0 to 1 Dimension, it is Negative viewed on a Graph of a Sin Wave, this is below the x-axis, viewed as a Helix, this is driving the Atom down to -1, when it start to rise, it shifts to the 2<sup>nd</sup> Dimension, so it stays longer in the 3<sup>rd</sup> Dimension, which is why Atom's appear to be Solid, they pass through the 0 Dimension when changing from negative to positive, note that if they follow the pattern:  $1 + (-1) = 0$ , this Trinary Math constant function will only toggle from one state into the next, once positive, next negative, back to positive, it is a loop, so no changes to Direction were made, its just following a path that if unchanged it will repeat this pattern till the end of time, so when it does make a change, this is called Intelligence, and that is how we can move our Fingers, walk, talk, and do anything, so every Atom in our Body has to follow these Rules. Trinary Space has 3 State changes, these changes take place in the 0, 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> dimensions, which make

up the 3 Dimensional Space ( $0 + 3 = 3$ ), and it should be noted that the 4<sup>th</sup> Dimension is only a reference to the 3<sup>rd</sup> Dimension, and dimensions beyond the 4<sup>th</sup> are only view-ports of that same space, which are not very helpful unless you want to see what you saw, so you can see what you seen, but maybe if you find yourself in a Room you can not get out of, just Look into a Mirror in your Mind, and see what you Saw, now take that Saw and Cut something in Half, but the Halves together to make it Whole, now use that Hole to get out of the Room, now that is how Wizards explain what happens to the Atom when it is invisible, it seen what it saw and said I am out of here, so all joking aside about how other Sciences view Space, Trinary Space is not the same Space Einstein wrote about, but Sir Isaac Newton wrote the Math that explains how Trinary Space works.

---

## Trinary Science

### Trinary Science

Trinary Science is based on Trinary Energy, so its based on the concept that Trinary Logic builds on Trinary Intelligence, and has its own set of rules that govern the Trinary Universe, the foundation for this Science has been handed down for thousands of years and was written in the Bible, which refers to the source of all Bibles for all Religions, but does not reference the Bible as Religion, but as Science, as such, this Science was defined by many Scientist throughout History, so I refer to these Scientist as Wizards, since Sir Isaac Newton was the Last Magician, and Nikola Tesla was the Last Wizard, and for the same reason I appended the Word or Spell "**Trinary**" before many Terms like: Space, Time, Energy, and the Universe itself, and that is because Trinary is the foundation of this Science, and the Term Trinary refers to the 3 State Logic, which was known as Trinity in the Bible, or the Father, Son and Holly Ghost Spirit of Mother Nature, Heaven, Mother Earth and Hell, so we define God: All Light without Darkness, also there can be no Light without the Darkness, so we have: Darkness without Light, and God Controlling all 3 types of Light, so I had to rename things by adding the prefix to distinguish between Religion, Science Fiction and Mainstream Science, because as of the original writing date of this document, which started in 1969, the concept of Mainstream Science was based on the Dynamic Universe, based on Albert Einsteins Theory he did not believe, since he would have believed in the Newtonian Universe that this Science is based on, so Religion and all other Sciences are totally incompatible with the Science of Trinary.

## Trinary Time

### Trinary Time

Trinary Time is a measurement system that is based on the Speed of Light, it describes how much time it takes for Light to travel the distance of a billionth of a hydrogen Atom, currently an attosecond is one Quintillionth ( $10^{-18}$ ) of a second and 1 attosecond is the time it takes for Light to travel the distance of 3 hydrogen Atom's. The closer order of time in the scale might be Tredecillion ( $10^{-42}$ ) or larger.

Trinary Time is divided into 3 categories depending on the resolution required, such that a low resolution time is a Decillion ( $10^{-33}$ ), a medium resolution is Tredecillion ( $10^{-42}$ ), and a high resolution time is short scale Unvigintillion ( $10^{-66}$ ), although lower and higher numbers are possible, limits help to keep the units of measurement at a minimum of 3 standards.

Note: the use of a negative exponent is because time is normally measured in seconds, so a microsecond is  $10^{-6}$ , meaning a Millionth of a second, written 0.000001, or

Tritanium is not in the Periodic Table of Elements, but if you are going to add Theoretical Elements to the Chart, please add this one also.

## Vertice Matrix

### Vertice Matrix

Trinary Energy is defined as being the State of Flux or Aura that surrounds every Atom in the Universe, so the Light is defined in paths that it takes from that Atom outward in 360 degrees, so it is the Vertex of the Light of the Atom, and since all Atom's move in the Universe, the Matrix is all possible paths the Light can take at the Subatomic level. The Vertice Matrix describes patterns of AC wave forms, just build a table and prove it for yourself, you can plot out the course of an Electron around an Atom using Trinary Math.

State	Visibility	Graph												
+1	Solid		*				*				*			
0	Invisible	*		*		*		*		*		*		*
-1	Semisolid				*				*				*	
Time frame		1	2	3	4	5	6	7	8	9	10	11	12	13

**Table: Vertice Matrix of State Changes for AC wave form**

## Viggo

### Viggo

Viggo is a Dragon Hunter searching for the Dragons Eye in the Animated Series **"Dragons - Race to the Edge"**, part of the **"How to Train your Dragons"** series, and we all know that Wizards like Dragons, and need to Train them, but the dialog this character goes through in the first appearance of the series: was a performance worth watching 8 minutes into the 12<sup>th</sup> Episode in Season 4:

***" The line between Good and Evil is often unclear, Black and White can become Grey so easily, what one Soul considers Evil the other might consider righteous, the honorable Chief who fails to see this is found to be the fool "***

and he defines a Fool like this:

***" They say there are two ways to be fooled, one is to believe what isn't true, the other is to refuse to believe what is. "***

So you can see why **"How to Train Your Dragon"** Series is my favorite.

## Witch

### Witch

A Witch is a Life-Form that understands how to communicate using Imagination, and not words, Witchcraft is the user of Words and Spells to describe Imagination, the type of Animal or even the Gender of the Animal is unimportant.

The modern definition of what a Witch is does not matter in the context of how I use the term Witch or Witchcraft, since the word Witch means to communicate with Imagination, and Witchcraft is done with Images, so Witchcraft is Art, so the term Artist and Witch mean the same thing in modern times, and even that word does not imply gender. So the term Trinary Witch takes on a whole new meaning to the word Witch.

---

## Wizard

### Wizard

A Wizard is a Life-Form that understands Alchemy, and how to communicate using Witchcraft what uses Words and Spells, which are how we define what letters are in a word and what order they should be in to Spell it, and it is a step by step process, which involves the teaching of every discipline in Nature, so you fully understand each word, and it is Spell, so Wizards were teachers, and that term does not imply gender, and they are also the best in their Field of Study.

The modern definition of what a Wizard is does not matter in the context of how I use the term Wizard, I will normally refer to a Human, Gender does not matter, nor does Race, Color, Nationality, or any other way of classifying humans, and like I said, it is all Lifeforms, so Human does not matter, because it only refers to humans that believe in the Light of God that I call Trinary Energy, so see Wizzards with two Z's.

---

## Wizzard

### Wizzard

A Wizzard is the Scientific name for God who is All Light without Darkness.

Witch is why it has two Z's, the Bible states that God is all Light without Darkness, and Sir Isaac Newton proved that there can be no Light without the Darkness, so this God has 3 State Changes:

### There are 3 types of Light:

Light without Darkness

Darkness without Light

Massless Light and Dark Energy

1. Father
2. Son
3. Holy Ghost Spirit of Mother

1. Heaven
2. Mother Earth
3. Hell

I call them:

1. Solid
2. Semisolid
3. Invisible

and assign them the value 1, -1 and 0.

There are 3 types of Wizzards: Light, Dark and every Shade of Grey in between, these types also have Wizard counter parts, Wizard with one Z, means it is a Life-Form that shares a Life with the Light, becoming one Life-Form with the Light, becoming a Light Being, as Nikola Tesla calls them, but to avoid confusion, I just used the terms that were common throughout all the Ages, and that term is still Wizzard and Wizard, so we have Light, Dark and Grey Wizzards and Light, Dark and Grey Wizards, these Wizards teach Sheeple lessons about Life and how the Universe works, they understand the Universe in ways that Sheep like Ewe will never understand.

Wizzards are pure Massless Energy, also known as "**White Noise**", and I call it Trinary Energy, where the Light Wizard is the Brightest of all the Wizzards, and the Grey Wizzard is not as Bright, and the Dark Wizzard is so Dark you can not even see it at Night.

---

## Yew

### Yew

Yew refers to a chain of events that Sheeple call Logic and Reasoning, so when we follow this chain of events, we find that Words are just Spells that Wizards used to Communicate concepts, so Yew starts off as a type of Tree called TaxUS, so its Real and Really Exist as Empirical Evidence, so Ewe, which are Female Sheep eat this Yew because they do not know its bad for them, and then they Shit out Yew, so its Yew Shit, and the Logic is that Yew is Shit, it physically exists in Reality, but unlike You, which may sound the same and confuse people who do not understand how Wizards use Spells, which makes them Ignorant to the ways of a Wizards Spells, so it does not make them Stupid, it just makes any arguments made about yew a miscommunication, in writing this is hard to do, most people will think its just a typo, and tell you to spell it correctly, as if you can tell a Wizard how to Spell, only a Witch can do that, they are actually much better at Spells, but few will even notice the difference in how you pronounce the two, so its easy to use Wizards Spells, so if someone disagrees with you, just tale them that is what yew believe, because yew means TaxUS or Shit for Brains, so you do not insult people, you insult Sheeple, you should never insult People, but you can insult Sheeple because yew have Shit for Brains, and Trinary Humor is required at all times, so it must be Entertaining, so I will always tell everyone how stupid yew are, and Yew is what I named my Sheep in my Flock, and as a Sheep Dog, Yew is all I have to worry about.

## Table of References

I do not like using Wikipedia also known as "*Wackypedia*" as a reference, because in my opinion this site is geared only to serve those who are making Money from it, and they have No Interest in the Truth, thus its "*Mainstream BS,*" and prints lies about people who have no recourse to get the lies removed, making it a worthless disinformation website, nor will they allow anyone to add content about real science to it, I have tried and found out what that website is all about, and Truth is not it, but Money and controlling what people know, and only giving you their version of the subject, as if it was a fact, so it has no Scientific value to me, and like most references I use, they have nothing to do with what I am referring you to, so this whole idea of references, patents, copyright, trademarks, and so on, are all a waist of time and resources, because it is all tied to Money, and this document wants nothing to do with Money: so I despise having to write in a way that is Legal, instead of a way that is true, but I make exceptions for the ones that I do use, because I can not find a good source of knowledge from a reputable website, nor any websites that shares my view on the subject, because in all my life I have not found any information other than that I cite, that even refers vaguely to what I am explaining, so to make writing easier from me, you must assume that all the words I used came from myself, or one of the sources I list here as References, which also include any books or notes I have accessed in my lifetime, but do not remember where I got this information from, since my memory is notably impaired due to my medical conditions, so some words my have been copied directly from a web-page on the Internet, I try to reference those here, but if I do not, you can assume it came from somewhere, and the last place I would look is in my own Mind.

## Galileo Galilei

*Galileo Galilei* [Full Size](#)

Born: 15 February 1564, Pisa, Italy

Died: 8 January 1642, Arcetri, Italy

Was known as: Astronomer, Physicist, Engineer, Philosopher, and Mathematician. His discoveries with the telescope revolutionized astronomy and paved the way for the acceptance of the Copernican heliocentric system, but his advocacy of that system eventually resulted in an Inquisition process against him.

## Johannes Kepler

*Johannes Kepler* [Full Size](#)

Born: 27 December 1571, Weil der Stadt, Germany

Died: 15 November 1630, Regensburg

Known for his laws of planetary motion.

Kepler's three laws of planetary motion can be stated as follows:

- ▲ All planets move about the Sun in elliptical orbits, having the Sun as one of the foci.
- ▲ A radius vector joining any planet to the Sun sweeps out equal areas in equal lengths of time.
- ▲ The squares of the sidereal periods of the planets are directly proportional to the cubes of their mean distances from the Sun.

## Reference: Sir Isaac Newton

*Sir Isaac Newton* [Full Size](#)

Born: 25 December 1642 Julian Calendar

Born: 4 January 1643 Gregorian Calendar

Born in: Woolsthorpe-by-Colsterworth, United Kingdom

Died: 31 March 1727 (Gregorian Calendar), Kensington, London, United Kingdom

Education: Trinity College, Cambridge (1666-1669 Julian Calendar) (1667–1668 Gregorian Calendar)

Sir Isaac Newton was known for proving that God was All Light without Darkness, but his quest took him into Witchcraft and Alchemy, and in his quest to find out how the people who wrote the Bible knew that God was All Light without Darkness, he discovered that Christ was inserted into the Bible to hide the fact that Jesus Bar/Abbas defeated the Roman Empire, his notes on this subject became public domain back in the late 1800's, and he was soon branded as the Antichrist by Christians, who would rather go along with the Lie about there being two Jesus's in the Bible, just so they could continue to use Money and Murder people in the Name of Christ, as a result the Christians pushed for Albert Einstein's Theory, that Proved that God did not Exist, making Christians Anti God believers, and proving why Santa and Satan have the same Characters in it, and why Christians are all Liars and Satanic, because only Satan Lies about God and Science, and for thousands of years Christians have murdered in the name of Christ, making them the most insane people on the planet, who build weapons of Mass Destruction using God as Fuel for their Weapons, because only Evil People make Weapons to Kill, and Christians are the most Evil people on the Planet, they allow the Blood of the Planet to be used as Oil and Fuel, which is killing the Planet and all Life on it, all so they can use Money and Lie about God, stating that God does not Physically Exist in the Universe, because Christians do not believe in God, they Worship Money, and Engrave In God we Trust on it, when their Science based on Theories that are never Proven to be a Fact, states that God did not Create the Universe, Chaos did, so my Cousin Newton called them Sheeple, because if the Lord is their Shepard, that makes them Sheep, and Newton would have no problem putting the Sheep in their Place, because they denounced his Science, and those Liars that follow the Godless Dynamic Universe, still use his Math that is based on the Light of God being the Force of Gravity, so Newton proved that all Religious people are Mad, and men like Washington, Jefferson, Adams and Franklin all warned you about them, and now that the United States has been Conquered by Religious Satanic Liars, its Constitution was Abolished til its Debt is paid off, which was Ironic that they put Newton in charge of the Mint knowing how Evil Money is, and how much Newton hated the use of Money and Taxation just like Jesus Bar Abbas, so as it turns out, the Teaching of Jesus was about Money and Taxation, and nothing to do with Religion, Bar/Abbas was a Warrior who fought for Freedom, and the Christians Banished Newton's Science because they are all Cowards and Liars, and as the Author of this book, the views of Sir Isaac Newton do reflex as the views of the Author, I like Newton before me, only write about the Truth and Facts we can Prove.

## Edmond Halley

### **Edmond Halley** [Full Size](#)

Born: 8 November 1656 Gregorian Calendar

Died: 14 January 1742 Gregorian Calendar (Jeffrey Scott Flesher's Birth date)

Born: 29 October 1656 Julian Calendar

Died: 25 December 1741 Julian Calendar (Sir Isaac Newton's Birth Date)

Born in: Haggerston, London, United Kingdom

Died in: Greenwich, United Kingdom

Education: St Paul's School, London, The Queen's College, Oxford, University of Oxford.

Known for a Comet named after him: Halley's Comet, that his best Friend Sir Isaac Newton calculated for him one day when they were smoking Cannabis, which Halley wrote more about Cannabis than the Comet he is known for.

## Benjamin Franklin

*Benjamin Franklin* [Full Size](#)

Born: 6 January 1706 Julian Calendar

Born in: Boston, Massachusetts, North America

Died: 17 April 1790 in Philadelphia, Pennsylvania

Education: Boston Latin School.

He was known for Flying a Kite in a Lightning Storm to Prove Sir Isaac Newton was Right about God being in Lightning.

## Isaac Newton Flesher

*Isaac Newton Flesher* [Full Size](#)

Birth: 22 November 1796 in Weston Lewis, West Virginia, USA (Note: City named after Grandfather Weston Flesher)

Death: 29 June 1841 (Age 44) in Goose Island, Mason, West Virginia, USA (Note: Family was given Bounty)

In 1859 Isaac Newton's widowed wife Elizabeth: who was allowed bounty land on Goose Island in satisfaction for the services rendered by: Isaac Newton Flesher in the War of 1812.

Isaac Newton Flesher is the first cousin five times removed ascendant of Jeffrey Scott Flesher.

Like most Ashkenazic Jews, Isaac Newton was named after dead relatives, which is why he named one of his sons Benjamin Franklin. Isaac was the first person to decode Sir Isaac Newton's notes to my knowledge, I inherited papers he wrote about Science and the World, topics that covered Masonic Legends, the Bible and work of other Wizards.

## Benjamin Franklin Flesher

*Benjamin Franklin Flesher* [Full Size](#)

Birth: 1 August 1835 in Meigs, Ohio, USA

Death: 13 May 1905 (Age 69) in Sullivan, Indiana, USA

Named after Benjamin Franklin, because Ashkenazi only named their children after dead relatives.

Benjamin Franklin Flesher is the second cousin four times removed ascendant of Jeffrey Scott Flesher.

## Nikola Tesla

*Nikola Tesla* [Full Size](#)

Born: 10 July 1856 in Smiljan, Croatia

Died: 7 January 1943 at Wyndham New Yorker Hotel, New York City, New York

Education: Graz University of Technology and Gymnasium Karlovac

Known for making Electric Generators, and for being a Crazy Old Wizard, because he believed we are all Light Beings.

## Albert Einstein

**Albert Einstein** [Full Size](#)

Born: 14 March 1879, Ulm, Germany

Died: 18 April 1955, Princeton, NJ

An Ashkenazi known for writing the Theory of General Relativity, few know that he publicly denounce it, stating he only believed in the Newtonian Universe, most critics dismiss it as Albert finding Religion, but Newton was not Religious.

## Hans Asperger

**Johann "Hans" Friedrich Karl Asperger** [Full Size](#)

Born 18 February 1906 in Hausbrunn, Austria-Hungary

Died 21 October 1980 in Vienna, Austria

Education: University of Vienna

Due to his earlier work on Autism Spectrum disorders, Asperger Syndrome (AS), was named after him.

Born in Vienna, Asperger published the first definition of Asperger's Syndrome in 1944. In four boys, he identified a pattern of behavior and abilities that he called "**autistic psychopathy**", meaning autism (self) and psychopathy (personality). The pattern included: "**a lack of empathy, little ability to form friendships, one-sided conversation, intense absorption in a special interest, and clumsy movements.**" Asperger called children with AS "**little professors**", because of their ability to talk about their favorite subject in great detail.

About Me: also known as the Flesh: I originally started to write a book and make videos for Humans, but Humans threatened to sue me, take me to court, and to kill me, and this got old real fast, so now I have no interest in writing books or making videos for Humans, because there are none that are smart enough to debunk what I have to say using Facts, they say they are facts, but they are Theories, stupid ones at that, because Normal Neurotypicals are retarded when it comes to Physics and Math, sorry if I offend yew, but if you believed in Mainstream Science of the Dynamic Universe, yew proved yew were retarded, and yew are also so arrogant and ego driven, that yew can not admit how stupid yew are, and what is so funny is that it really does not make any difference how high my IQ score is, or if I am even Autistic, I only bring this up because it is the truth, and this truth is funny so its Entertaining, and when you call People Stupid they get all Defensive, till they understand I only call Yew Stupid most of the time, and since most of what I had to say was what both my Cousins Isaac Newton and Benjamin Franklin Flesher, or the men they were named after, and Nikola Tesla, and even Albert Einstein who Denounced All these Theories on Tesla's Birthday, and said he only believed in Newton, so everyone that was Intelligent said the same thing: Christ was inserted into the Bible, so get over it, it is a Fact and has been for thousands of years, just like the Constitution was Suspended in 1863, see the U.S. CODE of FEDERAL LAW TITLE 12 CHAPTER 3 SUBCHAPTER 9 SUBSECTION 341, under the Enumeration of the Powers Act, its clear that the Federal Reserve does more than just Print the Money instead of Congress, which by itself is clearly Treason under the Constitution, since its clear that the Federal Reserve has its own President, and the United States Government falls under their control, so everyone that works for Money works for the Bank, including all the Courts, and this is Treason under the Constitution, and why President Lincoln was executed by the Militia, that fought for the War of Independence, just to be defeated during the Civil War no matter what side won, because Lincoln took out a loan using the Country as Collateral, and why the Militia are now outlaws in their own Country, and it is Treason to try to take it back, and that was Treason under the Constitution; proving it does not exist, so nothing I said actually requires a high IQ or an Autistic Mind, it just requires someone to understand it, and that is all I claimed to do; and you can check my Military Records, do a Freedom of Information Act Release also known as a FOIA, and you will find that I have 3 of the highest Achievement Awards given out by the Military, two of them are from the Air Force, this does not prove anything other than the fact I understood how to get those Awards, and that is an Achievement, but understanding that my Country is owned by Treasonous Criminals, and we are doing their Bidding, just like Jesus Bar Abbas did, and why Sir Isaac Newton wrote so much about it, because that does not sit well with him or me, we think that the Truth should actually be the Truth; so stop lying about what and who God is, since I proved beyond a shadow of a doubt that God is All Light without Darkness, and I swear to this on the Bible using the Bible as a Reference, and what Newton called God as my Witness: Newton's Math does not work unless it works the way I described in this Book, that is not Ego Driven, nor is it Arrogance, it is a fact, and the reason I know this is a fact: because in thousands of years this Science has not changed, its always been described the same way, in this case Trinity witch I renamed to Trinary, so if you still want to sue me for writing this Book to a Sheep named Yew, do not expect me to show up, because I do not care, because yew have no Rights under the Constitution, but I am Retired Military and I do have Rights under the Uniform Code of Military Justice (UCMJ),so I made sure I did nothing to break any of those Laws, sure I got into a lot of trouble during my lifetime, but I was never charged with any crimes as an Adult, been in jail, just never charged with

anything, because PTSD is still not a crime, not yet anyways; and the Military Diagnosed me with OCD in the Autistic Spectrum 6 years before I was Medically Retired, for Major Depression, Anxiety with PTSD, and a back that got broken twice and is now Arthritic: which was the official reason I was Medically Retired, because Gulf War Syndrome was being denied back then, I did not even know I had it until I was diagnosed by the VA, and found out that a Batch or Lot of Anthrax Live Protein Experiment Vaccine was given to me, as part of a Control Group in an Experiment where over 290,000 Military members got some form of the Anthrax Vaccine, or a placebo, if you look at those people: 270,000 committed suicide, and none of them were given a Placebo, these facts come from the VA, and was published in their Periodical, so my Documentation and references are easy enough to find, but I did not include a lot of them, because I only included ones that might apply to what I have to say, and Newton's and Tesla's work does apply in whole, even their Failures, because I know I have made more than a few Logical Errors in this book, I will say "**not**" when I meant it at the time, then I change my sentence structure to word it grammatically less confusing, but forgot to take out the not, because I write like Yoda at time, and fixing those errors is hard for me, I am Dyslexic on the Autistic Spectrum, this means I do not see my errors, a spell checker can fix words but not numbers, and not concepts or logic errors, plus I have OCD, so I repeat myself, and write or talk a lot, and knowing my audience is a Stupid Sheep named Yew, I have to talk as if yew are Stupid, but I always have something Interesting to say, at least Interesting to me, but yew are normally interested in other things. My Military IQ scores can be obtained via a FOIA release, I would have to be insane to make up an IQ score as crazy as over 180, if I could not prove it, but in truth, you would have to create new test to measure my IQ, not that I think my Intelligence is that much more superior, but I am intelligent enough to understand that your Mainstream Science, that is based on Theories, specifically those written and denounced by Albert Einstein, proving that if your Science is so Stupid, so are all your Test. In fact that makes everyone that believed in Mainstream Science Stupid, but what did you expect, both of my Grandparents were Engineers with high IQ's, both high ranking Masons, and both in the Military, my Grandmother was assigned to the Pentagon as an Engineer, that is how they met, so I have a Story to tale, and for the most part, it is all Documented via Public Domain and using the FOIA. If you want to know who owns this Country, do a FOIA and ask who prints the Money, if its Not Congress, then it is not We the People, its We the Sheeple, and if those Sheeple think they can take this Country back from the Banks, keep in mind that the Police and Military have always worked for the Banks, and it is Treason to take this Country back, I am not about Taking the Constitution back, you can Smoke if for all I care, if it was not worth Fighting for back in 1863 then it is not worth Dying for now, and I work for the Military, and take orders from only them, well my Wife first oh course, I am not insane, but she is Military also, so I repeat myself so you will get the message, and if you do not believe me, then read all about Sir Isaac Newton and Nikola Tesla, and keep in mind that History would have forgotten their Science, if it was not for me fighting for Real Science based on Facts and not Theory, and it is why I fight only for Trinary Sanctuary, and it is run by the Militia just like Jesus Bar Abbas would have run it, according to the Bible, but not as a Religion, but as an Advanced Society that only believe in the Truth and not Secrets.

Carl Munck, the world's first Archaeocryptographer, spent 20 years in the U. S. Air Force and another decade in the railroad industry before beginning his search for answers to the unsolved mysteries of Sacred Sites. In doing this, he says, he adheres to no dogma — only evidence. To invent the science of Archaeocryptography, it was necessary for Munck to study cartography, global positioning, archaeology, oceanography, catastrophism, volcanism, paleomagnetism, ancient metrology, and some of the more exotic realms of mathematics. Today, with several books and videos to his credit, he is retired, but remains active with research and site analysis, both at his desk and in the field.

Today we view numbers as merely an expression of quantity. To the ancients, every number had its own character and identity; a place in an arithmetic chain that leads from one dimension of understanding to another. This extraordinary system of arithmetic, or concealed geometry, form the link between the languages of literature and mathematics....ancient literature, metrology, (the system of measures) and Sacred geometry can be viewed with new eyes. With numbers... cryptography becomes the law. Biblical numbers and structure dimensions become alphabetical statements. The WORD (number) becomes FLESH (dimensional) for numbers are words.

## Galaxy Spinning at the same Rate

*Illustration: The Galaxy Spinning all Solar Systems at the same Rate* [Full Size](#)

I must point out that this is just one image and I just circled two Stars, and then rotated the image, I could have set up my Telescope and took an Image of the Galaxy over time, but it would take 266 Million years to complete it, so I had to fake it to make a point, but in reality, they can measure some movement over many years that proves that this is what will happen over time, so the image is fake but the data is not, so the concept is the truth.

## Color Confinement

**Color Confinement**

[https://en.wikipedia.org/wiki/Color\\_confinement](https://en.wikipedia.org/wiki/Color_confinement)

Color Confinement is the phenomenon that color charged particles (such as quarks) cannot be isolated singularly, and therefore cannot be directly observed. Quarks, by default, clump together to form groups, or hadrons. The two types of hadrons are the mesons (one quark, one antiquark) and the baryons (three quarks).

## Upper Atmosphere Lightning

**Upper Atmosphere Lightning**

[https://en.wikipedia.org/wiki/Upper-atmospheric\\_lightning](https://en.wikipedia.org/wiki/Upper-atmospheric_lightning)

Upper-atmospheric lightning or ionospheric lightning are terms sometimes used by researchers to refer to a family of short-lived electrical-breakdown phenomena that occur well above the altitudes of normal lightning and storm clouds. Upper-atmospheric lightning is believed to be electrically induced forms of luminous plasma. The preferred usage is transient luminous event (TLE), because the various types of electrical-discharge phenomena in the upper atmosphere lack several characteristics of the more familiar tropospheric lightning.

## Sprite Lightning

**Sprite Lightning**

[https://en.wikipedia.org/wiki/Sprite\\_\(lightning\)](https://en.wikipedia.org/wiki/Sprite_(lightning))

Sprites are large-scale electrical discharges that occur high above thunderstorm clouds, or cumulonimbus, giving rise to a quite varied range of visual shapes flickering in the night sky. They are triggered by the discharges of

positive lightning between an underlying thundercloud and the ground.

Sprites appear as luminous reddish-orange flashes. They often occur in clusters within atmosphere above the troposphere at an altitude range of 50–90 km (31–56 mi). Sporadic visual reports of sprites go back at least to 1886, but they were first photographed on July 6, 1989 by scientists from the University of Minnesota and have subsequently been captured in video recordings many thousands of times.

Note: Nikola Tesla wrote that all Life is a Light Being in a Body of Flesh, he also wrote about Ball Lightning, and tried to reproduce it, he said it was the Key to all Life.

## Nebula

### Nebula

<https://en.Wikipedia.org/wiki/Nebula>

A Nebula (Latin for "**fog**"; pl. Nebulae, or Nebulas) is an interstellar cloud of dust, hydrogen, helium and other ionized gases. Originally, nebula was a name for any diffuse astronomical object, including Galaxies beyond the Milky Way. The Andromeda Galaxy, for instance, was once referred to as the Andromeda Nebula (and spiral Galaxies in general as "**Spiral Nebulae**") before the true nature of Galaxies was confirmed in the early 20<sup>th</sup> Century by Vesto Slipher, Edwin Hubble and others.

## Quark

### Quark

<https://en.wikipedia.org/wiki/Quark>

A quark is an elementary particle and a fundamental constituent of matter. Quarks combine to form composite particles called hadrons, the most stable of which are protons and neutrons, the components of atomic nuclei. Due to a phenomenon known as color confinement, quarks are never directly observed or found in isolation; they can be found only within hadrons, such as baryons (of which protons and neutrons are examples) and mesons. For this reason, much of what is known about quarks has been drawn from observations of the hadrons themselves.

## Barred Galaxy

**Barred Galaxy** [Full Size](#)

Explanation: A recent survey of stars conducted with the Spitzer Space Telescope is convincing astronomers that our Milky Way Galaxy is not just your ordinary spiral galaxy anymore. Looking out from within the Galaxy's disk, the true structure of the Milky Way is difficult to discern. However, the penetrating infrared census of about 30 million stars indicates that the Galaxy is distinguished by a very large central bar some 27,000 Light-Years long. In fact, from a vantage point that viewed our galaxy face-on, astronomers in distant galaxies would likely see a

striking barred spiral galaxy suggested in this artist's illustration. While previous investigations have identified a small central barred structure, the new results indicate that the Milky Way's large bar would make about a 45 degree angle with a line joining the Sun and the Galaxy's center. DON'T PANIC ... astronomers still place the Sun beyond the central bar region, about a third of the way in from the Milky Way's outer edge.

## Sine wave

[https://en.wikipedia.org/wiki/Sine\\_wave](https://en.wikipedia.org/wiki/Sine_wave)

A sine wave or sinusoid is a mathematical curve that describes a smooth repetitive oscillation.

A sine wave is a continuous wave.

It is named after the function sine, of which it is the graph.

It occurs often in pure and applied mathematics, as well as physics, engineering, signal processing and many other fields.

Its most basic form as a function of time (t) is:

$$y(t) = A \sin(2\pi ft + \varphi) = A \sin(\omega t + \varphi)$$

Full Size

where:

A = the amplitude, the peak deviation of the function from zero.

f = the ordinary frequency, the number of oscillations (cycles) that occur each second of time.

the angular frequency, the rate of change of the function argument in units of radians per second.

$$\omega = 2\pi f$$

= the phase, specifies (in radians) where in its cycle the oscillation is at t = 0.

$\varphi$

When  $\varphi$  is non-zero, the entire waveform appears to be shifted in time by the amount

$\varphi$

seconds.

$$\varphi/\omega$$

A negative value represents a delay, and a positive value represents an advance.

## **Magnetosphere**

<https://science.nasa.gov/heliophysics/focus-areas/magnetosphere-ionosphere>

A magnetosphere is the region around a planet dominated by the planet's magnetic field. Other planets in our solar system have magnetosphere's, but Earth has the strongest one of all the rocky planets: Earth's magnetosphere is a vast, comet-shaped bubble, which has played a crucial role in our planet's habitability. Life on Earth initially developed and continues to be sustained under the protection of this magnetic environment. The magnetosphere shields our home planet from solar and cosmic particle radiation, as well as erosion of the atmosphere by the solar wind - the constant flow of charged particles streaming off the sun.

Earth's magnetosphere is part of a dynamic, interconnected system that responds to solar, planetary, and interstellar conditions. It is generated by the convective motion of charged, molten iron, far below the surface in Earth's outer core. Constant bombardment by the solar wind compresses the sun-facing side of our magnetic field. The sun-facing side, or dayside, extends a distance of about six to 10 times the radius of the Earth. The side of the magnetosphere facing away from the sun - the nightside - stretches out into an immense magnetotail, which fluctuates in length and can measure hundreds of Earth radii, far past the Moon's orbit at 60 Earth radii.
